You will be contacted as soon as possible.

Contents

Introduction	v
I Superstring Theory	1
1 Type IIA and Type IIB Superstring Theory	5
1.1 The World-Sheet Action	5
1.1.1 Canonical Quantisation	6
1.1.2 Massless Spectrum	8
1.1.3 T-Duality	12
1.2 Low Energy Effective Action	15
1.2.1 Supergravity Theory in Eleven and Ten Dimensions	15
1.2.2 Couplings of String Theory	17
1.3 Non-Perturbative Aspects	20
1.3.1 M-theory	20
1.3.2 Branes	21
1.3.3 D-brane World-Volume Action	29
1.3.4 Gauge/Gravity Correspondence	32
1.3.5 S-duality	34
II String Compactification	41
2 Calabi-Yau Compactifications	45
2.1 (2,2) Superconformal Field Theory	45
2.1.1 $\mathcal{N} = 2$ Superconformal Algebra	46
2.1.2 Chiral Ring	47
2.1.3 Spectral Flow	51

ii Contents

2.1.4	Topological String Theory	52
2.1.5	Elliptic Genus and Vector-Valued Modular Forms	56
2.1.6	Mirror Symmetry and Non-perturbative Effects	60
2.2	Spacetime Physics	61
2.2.1	Moduli Space and Special Geometry	61
2.2.2	Four- and Five-Dimensional Low Energy Supergravity Theory	68
2.2.3	Range of Validity and Higher Order Corrections	76
3	K3 Compactification	79
3.1	(4,4) Superconformal Field Theory	79
3.2	Moduli Space of K3	81
3.3	Four-Dimensional Theories and Heterotic String Dualities	83
3.3.1	$\mathcal{N} = 4, d = 4$ Supergravity	84
3.3.2	Heterotic String Dualities	86
III	Multi-Holes and Bubbling Solutions	89
4	Black Holes and Multi-Holes	93
4.1	General Stationary Solutions	93
4.2	Extremal Black Holes and Attractor Mechanism	96
4.3	Properties of Multi-holes	98
4.3.1	Walls of Marginal Stability	99
4.3.2	Angular Momentum of the Spacetime	101
4.3.3	Split Attractor Flow	102
4.4	In Coordinates	102
5	More Bubbling Solutions	107
5.1	Introduction	107
5.2	The Lift of Multi-Center Solutions	110
5.3	Construct the Bubbling Solutions	111
5.3.1	M-theory Limit	111
5.3.2	Rescale the Solution	112
5.3.3	Specify the 4D Charges	115
5.4	The Properties of the Solution	116

5.4.1	The Conserved Charges	116
5.4.2	The Shape of the Solution	121
5.4.3	Large gauge Transformation	128
5.5	Conclusions and Discussion	129
5.6	Appendix 1: Reproduce the old Bubbling Solutions	131
5.7	Appendix 2: Constant Terms for General Charges and Background	133
IV	A Farey Tail for Attractor Black Holes	135
6	A Farey Tail for Attractor Black Holes	139
6.1	Introduction	139
6.2	Wrapped M-branes and the Near Horizon Limit	141
6.2.1	Wrapped Branes on Calabi-Yau and the Spectral Flow	141
6.2.2	The Near-Horizon Geometry and Reduction to Three Dimensions	146
6.3	The (0,4) Superconformal Field Theory	149
6.3.1	Counting the Degrees of Freedom	150
6.3.2	The Universal Sigma Model	152
6.4	A Generalised Elliptic Genus	156
6.4.1	The Modified Fermion Number	156
6.4.2	The Modular Properties	157
6.4.3	The Theta-Function Decomposition	158
6.4.4	The (Modern) Farey Tail Expansion	161
6.5	Spacetime Interpretation of the Attractor Farey Tail	162
6.5.1	Gravitational Interpretation of the Generalised Rademacher formula	163
6.5.2	Wrapped M2-branes	166
6.6	Summary and Conclusion	168
V	$\mathcal{N} = 4$ Dyons	169
7	Microscopic Degeneracies and a Counting Formula	173
7.1	Microscopic Degeneracies	173
7.1.1	1/2- and 1/4-BPS Solutions	173

7.1.2	Microscopic Degeneracies of $1/2$ -BPS States	174
7.1.3	Microscopic Degeneracies of $1/4$ -BPS States	176
7.2	The Counting Formula and a Borcherds-Kac-Moody Algebra . . .	178
7.2.1	Dyons and the Weyl Group	179
7.2.2	K3 Elliptic Genus and the Siegel Modular Form	184
7.2.3	The Borcherds-Kac-Moody Superalgebra and the Denominator Formula	187
8	Counting the Dying Dyons	191
8.1	Introduction	191
8.2	Dying Dyons and Walls of Marginal Stability	193
8.2.1	Determining the Walls	193
8.2.2	Stability Conditions from Supergravity Solutions	198
8.3	Contour Dependence of the Counting Formula	200
8.4	The Contour Prescription and its Interpretation	206
8.4.1	A Contour Prescription	206
8.4.2	The Attractor Contour for Large Charges	208
8.5	Wall-Crossing and Representations of the Algebra	209
8.6	Weyl Chambers and Discrete Attractor Flow Group	213
8.6.1	Weyl Chamber and Moduli Space	213
8.6.2	A Hierarchy of Decay	216
8.7	Arithmetic Attractor Flows	222
8.8	Summary and Conclusion	224
8.9	Appendix: Properties of Coxeter Groups	225
A	Mathematical Preliminaries	229
	Bibliography	239
	Samenvatting (In Dutch)	247
	Acknowledgements	251
	Index	253
