Acknowledgements

No thesis is complete without the very popular acknowledgements, so let’s start!

First of all, I would like to thank my promoters Kees Elsevier, Michel Pfeffer and Claude Sirlin.

I would not be here if you, Kees, would not have accepted me as your PhD student for the challenging project that was the beginning of my PhD research. Zerovalent palladacycles with N’C’ and biphosphinine ligands: I was so intrigued! Unfortunately, I am still intrigued!!! It was not the only challenging part of this thesis, the co-tutelle was something similar to chemistry, easy on paper but difficult in reality!!!

I would like to thank the members of my reading committee, Prof. Henk Hiemstra, Prof. Patrick Pale, Prof. Joost Reek, Dr. Frantisek Hartl and Dr. Gadi Rothenberg, for reading and approving my manuscript.

Prof. Shengming Ma, I would like to thank you for the nice collaboration, your stimulating discussions and the introduction into the field of the allenes, but as well for your kind hospitality during my stay in Shanghai. Hao Guo, I would like to express you my gratitude for your support, nice discussions concerning everything and for making my stay enjoyable in Shanghai (xiè xiè nǐ zuò hǎo péng yǒu). A special thought for all the laboratory members of the SIOC institute, Sylvain (l’oeil qui voit tout…) and Chris (Hey Jude was everything but certainly not a sad song!!!), I was really pleased to meet you; even those who were supporting the Italian team during the world cup…the final result gave them reason!!!

Thanks also to Prof. Luciano Canovese and Dr. Fabiano Visentin for the nice collaboration, for the kinetic measurements and the discussions of the obtained results in chapter 2 and 3.

My students, Claude Béraud-Sudreau and Ginger Lutteke are acknowledged for their fruitful and enjoyable contributions to the part of my research concerning the study of palladacyclopentadienes (Chapter 2 and 3).

To complete this work the contribution from analytical, technical and administrative department from UVA was very important. I therefore thank Dorette and Hans (general organisation of the lab), Jan-Meine and Jan (NMR), Han Peeters (Mass Spectrometry), Jan Fraanje and Kees Goubitz (X-ray Crystal Structures), Franti (Electrochemistry), Taasje (Foreign Affairs), Dr. Rob Zsom, Fred van den Aardweg, Petra Hagen, Renate Hippert, Britta Duiker, Maureen Sabander, Hideko Gieske and Loes Swaning (Administrative Support). Thanks also for some people from ULP, J-D Sauer and M. Coppe (NMR), A. de Cian and N. Kyritsakas (X-ray Crystal Structures), Noho (Administrative Support), Marc (Technical Support for the Auvergnat Scale Chemistry!!!), Céline Desvignes (Elementar Analysis).
All my friends and colleagues from Amsterdam, Anthony (ohh la vacchhee...Monaco a gagné), David (my first Spanish flatmate and probably the last, great puyo puyo player and good mouse’s mutating agent!!!), Fred (great trip to Laon and really nice concert of Morcheeba...no comment), Anil and Laura (nanoparticules specialists during the day, famous darts players the night), Marcel D. (head lab struggling with French invaders), Steve (the Luxembourguese postman), Zoran (The specialist of the Eurovision contest), Pablo, Ron, Enrico, Edward, Jeroen de P., Erica, Jeroen S., Melvin, Sander, Luc, Peter, Stefan, Frédéric, Mehul, Susana, Enrico, Nacho, Ana, Gadi, Marjo, Jurrian, Paul, Jaap, Hessel, and from Strasbourg, J-B et Johanne (membres incontournables du club des gastronomes en culotte courte), Mili (une soeurette strasbourgeoise que j’aurai plaisir à revoir quelque part en amérique latine), Matthieu, Céline, Robin et Stéphane (autres membres incontournables du club des gastronomes en culotte courte, d’Amsterdam à Strasbourg en passant par la Bavière, que de bons moments passés en votre compagnie), Julie (non, la transjurassienne n’est pas la plus longue course de ski de fond au monde), Alexisandro (le roi de la tartiflette n’importe quoi), Christophe (90.7 radio en construction...question à...), Mike, Vincent, Laurent, Jean-Pierre, Pape, Ludivine, Akram, Ali, Nicolas, Abdelatif, Anthony et tous leurs collègues du labo Pierre Braunstein.

Marc (Mon Canard), sans toi cette co-tutelle aurait été le cauchemar par définition, un grand merci pour ton accueil, ton aide et tes petits plats qui font de toi le Bocuse Auvergnat...une petite pensée à Maurice mon camarade de chambrée !!! Taasje (King of the Boulevard), thank you for everything you did, your help was precious but nothing is free of charge...so I had to suffer a lot following you in the rain and of course in the wind (your really annoying friend) or even worst on cobblestones during “De Ronde Van Vlaanderen”. Fortunately for me some “resting times” were also included in your program, like darts, blind tests, Gigi (thanks Paul for the Capirinhas) etc...
You both, or the incredible meeting of a “Volcan d’Auvergne” and the “King of the Boulevard of Surinam”, are my beastly boys oupps sorry, you are my paranymfs!!!

Un immense merci à mes parents, mais également à Elisabeth et Jean, merci de m’avoir permis de suivre ce long et chaotique cursus, merci pour tout le soutien que vous m’avez apporté durant toutes ces années.

Querida Vane, meu último pensamento é para você. Tu fostes um raio de sol dentro da chuva holandesa, muito obrigado pelo teu apoio a cada minuto e pela tua paciência durante esse tempo. Desculpe-me por todos os momentos de distância, porem esta epoca esta terminado...

Alex
