It is not permitted to download or to forward/distribute the text or part of it without the consent of the author(s) and/or copyright holder(s), other than for strictly personal, individual use, unless the work is under an open content license (like Creative Commons).

### Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, P.O. Box 19185, 1000 GD Amsterdam, The Netherlands. You will be contacted as soon as possible.

Brainmedia: One Hundred Years of Performing Live Brains, 1920–2020

Flora Christine Lysen

Dissertation 2020

Brainmedia: One Hundred Years of Performing Live Brains, 1920–2020

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad van doctor

aan de Universiteit van Amsterdam

op gezag van de Rector Magnificus

prof. dr. ir. K.I.J. Maex

ten overstaan van een door het College voor Promoties ingestelde commissie,

in het openbaar te verdedigen

op donderdag 28 mei 2020, te 10.00 uur

door Flora Christine Lysen

geboren te Nijmegen

Promotiecommissie:

Promotor: Prof. dr. P.P.R.W. Pisters, Universiteit van Amsterdam

Copromotor: Prof. dr. R. Zwijnenberg, Universiteit Leiden

Overige Leden:

Dr. S. Besser, Universiteit van Amsterdam

Prof dr. C. Borck, University of Luebeck

Prof. dr. J.F.T.M. van Dijck, Universiteit Utrecht

Prof. dr. H.O. Dijkstra, Universiteit van Amsterdam

Prof. dr. J.J. Noordegraaf, Universiteit van Amsterdam

Dr. J.A. Sconce, Northwestern University School of Communication

Faculteit der Geesteswetenschappen

# Contents

<b>Contents</b> .....	<b>6</b>
<b>Table of figures</b> .....	<b>9</b>
<b>Introduction</b> .....	<b>11</b>
Prelude: Live brain demonstrations in 1934 and 2014.....	11
Studying performances of live brains: an introduction.....	12
A critical history of brain science, or: Is the medium the message? .....	13
From metaphors to brainmedia: Theoretical concepts of media-historical research.....	18
A media-historical approach to the media enmeshed with brain science .....	21
Understanding scientific practices and communications through “performing knowledges” .....	24
Different Forms of Liveness: Watching the brain at work .....	27
Critical histories and the neuro-enchanted present.....	31
<b>1. The Birth of the Live Brain, 1820–1920</b> .....	<b>35</b>
Nervous subject, modern sensorium.....	37
Foucault’s “apparatus of neurological capture” .....	43
Examining and imagining the living brain .....	47
Conclusions .....	50
<b>2. Displaying Dynamic Brains: Illuminated Brain Models and the Enchanted Loom, 1928–1938</b> .....	<b>53</b>
A feverish image of the brain gone mad: Electro-brains and a crisis of representation.....	56
A glow-in-the-dark brain from Vienna.....	60
Animated brains for modern citizens .....	63
Searching for a dynamic image: Between <i>Gesamtbild</i> and <i>Gehirnwahrheiten</i> .....	65
Streaming headlines and the motograph brain.....	69
Tele-visual and televisual neurophysiology.....	72
Brains at work in office and factory: Living diagrams and a logic of instant display .....	76
Conclusions .....	79
<b>3. Demonstrating Brainwaves Beyond the Laboratory: EEG as White Magic and Dark Media, 1934–1941.</b> <b>85</b>	
Brainwave imaginaries and popularizing science .....	89
Framing EEG in print: vivid demonstrations and “the stuff that dreams are made on” .....	95
The “white magic” of science: EEG at the 1937 Paris International Exhibition.....	101
Dark brain media in Hollywood.....	108
Conclusions .....	114

<b>4. Broadcasting Live Brains: The Brain on Television and as Television, 1949–1957 .....</b>	<b>117</b>
Broadcasting science and a “television of attractions” .....	120
The brain ‘ <i>en direct</i> ’ and the epistemological seductions of television.....	123
Towards the brain as TV: The cybernetic living brain.....	129
Cortical (television) scanning, the “ineluctable inference” .....	134
Too close to the screen: television as trigger and mirror.....	137
The Toposcope: the brain displays itself.....	142
Conclusions .....	146
<b>5. Interfacing the Real-Time Brain: EEG Feedback in Art and Science, 1964–1977 .....</b>	<b>149</b>
The Groovy Science of Alpha .....	152
“Broadening Horizons” and “The Golden Age of Man” .....	155
“Disproportionate excitement” and the alpha fad .....	160
Circuited selves, media environments, and Radical Software.....	164
Techno-sensory interface projects and new modes of communication.....	170
New micro-temporalities of the brain in real-time.....	174
Conclusions .....	184
<b>6. Synchronizing Two Dynamic Brains: Art–Science Experiments and Neuroscience in the Wild, 2013-2019</b>	<b>187</b>
Investigating new forms of neuroscientific life.....	192
A real-world neuroscience with hyper-stakes.....	195
When works of art become scientific papers: Neurocentrism revisited .....	201
The allure of synchronization: Towards a critical media history of being on the same wavelength .....	205
Conclusions .....	213
<b>Conclusion.....</b>	<b>217</b>
Understanding contemporary live brains .....	219
Engaging live brains today.....	221
<b>Summary .....</b>	<b>225</b>
<b>Dutch summary .....</b>	<b>232</b>
<b>Bibliography .....</b>	<b>239</b>
<b>List of Sources of Figures.....</b>	<b>265</b>
<b>Previously published parts of the dissertation .....</b>	<b>269</b>
<b>Acknowledgements .....</b>	<b>272</b>

## Table of figures

Figure 1.1 Diagram showing the four chief association centers of the human brain, c. 1919 (illustration) .....	36
Figure 1.2 Charcot's scheme for interconnected left hemisphere cortical centers involved in oral and written language, c. 1883 (illustration).....	42
Figure 2.1 Fritz Kahn, <i>Die Lichtwahrnehmung</i> , 1929 (illustration).....	57
Figure 2.2 Dr. Edith Klemperer and dr. Robert Exner, Luminous Brain model from Vienna, c. 1931 (photograph) 61	
Figure 2.3 Edith Klemperer, Anatomical Model. 1931 (patent drawing).....	61
Figure 2.4 Push-button brain diagram, c. 1930 (photograph).....	64
Figure 2.5 Constantin Von Economo's plaster models of cyto-architecture, c. 1927 (photograph) .....	67
Figure 2.6 Fritz Lang, <i>Die Spione</i> , 1928 (film still).....	77
Figure 2.7 Science's Futile Attempt to Build a Perfect Mechanical Brain, 1934 (newspaper article).....	82
Figure 3.1 Why Radio May Have Uncovered a Sixth Sense!, 1926 (newspaper article).....	93
Figure 3.2 Here is a dream of Coney Island, 1936 (illustration) .....	99
Figure 3.3 Electroencephalography booth in the exhibition <i>La Biologie: Exposition Internationale De Paris</i> , at the Palais de la Découverte as part of the Paris International Exposition, 1937 (photograph).....	105
Figure 3.4 Edward Dmytryk, <i>The Devil Commands</i> , 1941 (film still) .....	112
Figure 4.1 Catching a Brain Wave, 1954 (television broadcast still).....	118
Figure 4.2 <i>En direct du cerveau humain</i> , 1956 (television broadcast still).....	124
Figure 4.3 <i>En direct du cerveau humain</i> , 1956 (television broadcast still).....	125
Figure 4.4 <i>En direct du cerveau humain</i> , 1956 (television broadcast still).....	125
Figure 4.5 <i>En direct du cerveau humain</i> , 1956 (television broadcast still).....	126
Figure 4.6 Analogy between a profile scanning device and the human brain, 1953 (illustration) .....	133
Figure 4.7 Trigger circuit, 1949 (illustration) .....	141
Figure 4.8 Vivian Dovey working with the EEG-set-up at the Burden Neurological Institute in Bristol, England. Toposcope display visible left from the subject, c. 1954 (photograph) .....	143
Figure 4.9 Toposcope display, 1957 (photographs).....	144
Figure 5.1 Alvin Lucier (left) and John Cage (right) preparing a performance of <i>Music for Solo Performer</i> , at the festival 'John Cage at Wesleyan', 1988 (photograph).....	150
Figure 5.2 Joe Kamiya with EEG-feedback set-up and subject, c. 1968 (photograph) .....	159
Figure 5.3 Covers of popular books on biofeedback and EEG-feedback, 1973-76 (book covers).....	162
Figure 5.4 Alpha brain wave feedback monitor, 1973 (photograph) .....	163
Figure 5.5 David Rosenboom, <i>Ecology of the Skin</i> , 1970 (photograph).....	165
Figure 5.6 Nina Sobell & Michael Trivich, Interactive Electro-encephalographic video drawings, 1972-74 (video stills) .....	166
Figure 5.7 Marc Bjorlund, no title, 1971 (illustration) .....	168
Figure 5.8 Richard Lowenberg, <i>Environetic Synthesis</i> , 1972 (illustration) .....	168
Figure 5.9 Feedback training with alpha train in Barbara Brown's lab, c. 1974 (video still) .....	172
Figure 5.10 Edmond Dewan, Brain-controlled Lamp Set-up, 1964 (television broadcast stills) .....	173
Figure 5.11 Jacques Vidal, General organization and computer architecture of the Brain-Computer Interface Laboratory at UCLA, 1973 (diagram).....	177
Figure 6.1 Suzanne Dikker and Matthias Oostrik, Mutual Wave Machine, 2014 (photograph). .....	188
Figure 6.2 Jean Livet, et. al., <i>Brainbow</i> image of dentate gyrus, 2007 .....	190
Figure 6.3 Jack Gallant explaining prediction of visual perception in movie viewing fMRI-experiment, c. 2011 (still of a <i>YouTube</i> video).....	191
Figure 6.4 Guillaume Dumas, Two-body neuroscience, Face-to-phases, 2013 (illustration).....	208
Figure 6.5 Two museum attendees participating in David Rosenboom's Vancouver Piece at the Vancouver Art Gallery, 1972 (photograph) .....	212
