CHAPTER 2 | The influence of oral health factors on the quality of life in older people: a systematic review
LR, CS, RW, and RV conceived and designed the review and developed the search strategy. LR, CS, and RW were involved in study selection. LR and CS were involved in the data extraction from included studies. LR was involved in the quality assessment. LR and CS were involved in the data analysis. LR, CS, RW, AF, ES, and FL were involved in the interpretation and discussion of results. LR and CS drafted the manuscript. RW, AF, ES, and FL were involved in revising the manuscript critically. All authors approved the final version of the article.

CHAPTER 3 | Oral health and orofacial pain in people with dementia admitted to acute hospital wards: observational cohort study
LR, ES, and FL conceived and designed the study. AF was involved in additional study planning and implementation. ES, FL, VV, LR, RW, and AF were involved in the processing, analysis and the interpretation of data. LR drafted the manuscript. All authors were involved in revising the manuscript critically and gave final approval of the manuscript.

CHAPTER 4 | Orofacial pain during rest and chewing in dementia patients admitted to acute hospital wards: validity testing of the orofacial pain scale for non-verbal individuals
LR, ES, and FL conceived and designed the study. AF was involved in additional study planning and implementation. ES, FL, VV, LR, RW, and AF were involved in the processing, analysis and the interpretation of data. LR drafted the manuscript. All authors were involved in revising the manuscript critically and gave final approval of the manuscript.

CHAPTER 5 | Prevalence and associations of orofacial pain and oral health factors in nursing home residents with and without dementia

LR, ES, and FL conceived and designed the study. AF was involved in additional study planning and implementation. VV, LR, and AF were involved in the processing, analysis and the interpretation of data. LR drafted the manuscript. All authors were involved in revising the manuscript critically and gave final approval of the manuscript.

CHAPTER 6 | Oral function and its association with nutrition and quality of life in nursing home residents with and without dementia

LR, ES, and FL conceived and designed the study. AF was involved in additional study planning and implementation. VV, LR, and AF were involved in the processing, analysis and the interpretation of data. LR drafted the manuscript. All authors were involved in revising the manuscript critically and gave final approval of the manuscript.

Curriculum Vitae

About the author

Liza Jeanne Marjon van de Rijt was born on the 26th of August 1992 in Nijmegen, The Netherlands. In 2010, she completed her Gymnasium education with distinction at the Nijmeegse Scholengemeenschap Groenewoud in Nijmegen. She started to study Dentistry at the Academic Centre for Dentistry Amsterdam (ACTA) in Amsterdam, The Netherlands, in 2010. Liza obtained her Master of Science degree in Dentistry with distinction in August 2017.

During her studies, she worked as a teacher in chemistry at the Stichting Studiebegeleiding Leiden (SSL) in Leiden and as a dental nurse in general dental practices in Amsterdam and Nijmegen. In 2012-2013, she was the secretary of Favervuta, the Student Association of the Faculty Dentistry. In 2014, she volunteered at the Mahanaim Foundation in Jakarta, Indonesia. Furthermore, she was the chairwoman of the Student Council of the Faculty Dentistry 2015-2016, and she was a member of the 'Blauwdruk' committee at ACTA, which delivered the blueprint for a new curriculum for both the Bachelor and Master degree Dentistry in 2016.

For her Master thesis, Liza designed and conducted a research project on orofacial pain in older people with dementia at the Marie Curie Palliative Care Research Department, Division of Psychiatry, University College London (UCL) in London, United Kingdom, in collaboration with the Department of Orofacial Pain and Dysfunction of ACTA. She received the highest possible grade for her Master thesis (10 out of 10) and her thesis was nominated for best Master thesis of the University of Amsterdam 2018 as well as best Master thesis of the Vrije Universiteit 2018. Right after her graduation, she started with her PhD on orofacial pain in older people with dementia, and continued the collaboration with the Division of Psychiatry, UCL in London, UK. In 2019, she lived in London for three months to collect data for her research. One of her publications led to a Publication Prize 2019, awarded by the Dutch Association of Gerodontology (NVGd).

Since her graduation in 2017, Liza is working as a general dentist at Tandartsen Weeshuis in Nijmegen. She will start the Orofacial Pain and Dysfunction profile of the postgraduate Master's programme in Oral Health Sciences at ACTA in September 2020.

Acknowledgements

This thesis was written with the help of many people who were directly or indirectly involved in the process.

Supervisors and co-supervisors

Dear professor Lobbezoo, dear Frank, I would like to thank you for all opportunities and supervision you provided in the past few years. It started with your help in arranging a research externship abroad in London for my Master thesis. This led to a very successful first collaboration with Liz Sampson and her department at UCL. Thank you for giving me the opportunity to continue this collaboration and conduct another research project as part of my PhD in London. Thank you for your great guidance both during my time at the department at ACTA and during my time in London. You always found time in your busy schedule to provide quick and thorough feedback, which gave me the opportunity to work very efficient. I am very grateful for your expertise and guidance during both my Master thesis and my PhD. It was a pleasure to work with you and hopefully we can continue working together in the future.

Dear professor Sampson, dear Liz, thank you for all your invaluable support during both research projects. Since the moment we first met in August 2016, you have been an incredible supervisor. Thank you for helping me getting two research proposals approved by the ethical committee in the UK. Thank you for your constant valuable supervision during the whole process of collecting data in London. Although you had a very busy schedule, you were always there for me if I had any questions. I would also like to thank you for your thorough and critical feedback. The interdisciplinary and international collaboration really helped me to develop my skills as a researcher. Furthermore, I would like to thank you for the warm welcome in the UK and inviting me to your home. You are a very pleasant person to know and to work with and I sincerely hope we will collaborate again.

Dear dr. Feast, dear Alex, thank you for all your effort and support during my visits to London. From the first moment I arrived, you made me feel at home and welcome at the department of UCL. You were always ready to help me overcome the challenges during the approval processes and data collection processes. Your expertise and guidance in these processes were very helpful and you always supported me in a very positive way. Thank you for all your time and effort in giving me valuable feedback. During my time in London you did not only became an amazing supervisor but also a friend, who really made my time in London an unforgettable experience.

Dear dr. Weijenberg, dear Roxane, thank you for your feedback, guidance and support during my PhD.

Research locations

I would also like to thank Victoria Vickerstaff for all her time and expertise regarding all statistical analysis. Your feedback has been very valuable and really helped me improve my statistical knowledge.

Dear Celine, thank you for writing the systematic review together. It was a pleasure working with you and hopefully we can work together again soon.

Another person I would like to thank is dr. Martin Smalbrugge. Thank you for your time to review my study proposals. Your feedback was very valuable.

Last, but not least, I would like to thank all ward staff, all care home managers, and all care home staff for their support during my time at the hospitals and care homes. I couldn't have conducted the studies without your help.

Paranimfen

Dear Joost, thank you for all your support during my time at ACTA. Your kindness and constant support inspire a lot of students and staff members at ACTA. Thank you for all the fun coffee breaks. Hopefully there will be more to come!

Dear Merel, since the start of my PhD you are my buddy at the department. I am very grateful we had the opportunity to start this journey together. Since then you have been a good friend and a great support. It is a lot of fun working together with you and I know we will share more wonderful moments.

Department of Orofacial Pain & Dysfunction

I would also like to thank all my other friends and colleagues from room 3N-75, Anna, Loreine, Julia, Bach-Van, and Magdalini. I really appreciate the great work atmosphere we created and all the fun diners and coffee breaks. Thank you for making the time at ACTA so enjoyable!

Dear Peter, thank you for teaching me and giving me critical and valuable feedback on diagnosing and treating patients with tooth wear at the clinic of our department. I have learned so much in the past few years. Furthermore, you are a very warm person, who is always open for discussing problems and who creates a safe learning environment at our department. Hopefully we can continue working together.

Dear Marisol and Chryssa, thank you for your constant support at the clinic. You were always happy to help even though you were busy yourself. I really admire the work you do, and looking forward to continue working together.

Dear Samara and Patricia, thank you very much for your support and help at and around the clinic in the past few years. I really enjoy working with you.

All other colleagues from the department of Orofacial Pain and Dysfunction, thank you for creating such a positive workplace.

Tandartsen Weeshuis

I would like to thank all my colleagues at Tandartsen Weeshuis for their support and for creating a wonderful and inspiring workplace, which makes the travel time more than worth it! I am looking forward to our further collaboration.

Family

Mom, I don't really know where to begin. First of all, thank you for always supporting me to bring out the best in myself. You always encouraged me to do something that makes me happy. Your enthusiasm for the dental profession inspired me to start studying Dentistry. Since then, I am really enjoying discussing cases and theoretical issues with you. We are now working together side by side at Tandartsen Weeshuis, which I enjoy so much. It is amazing to see the wonderful work you do and I am so grateful to have the opportunity to learn from you. Besides supporting me at the practice, you are also always happy to discuss my research as well.

Some people ask whether working with your mother is a good idea. Honestly, I have never been more happy and grateful that we have the opportunity to work side by side and inspire each other.

Dad, thank you for your unconditional support and always encouraging me. Together with mom you created the best home and youth we could wish for. You are always ready to help your children, whether it is driving up and down to Amsterdam for supporting at the hockey match or running the half marathon with me (at my speed). I am deeply grateful for everything you do for me and enjoy all moments we have together.

Luuk, as the oldest brother, you are an example for all of us. I really admire the work you do and how you combine that with your amazing family. I enjoy discussing matters with you and always happy to hear your advice. Furthermore, I appreciate

that you visited me twice during my stays in London and really enjoyed our time together.

Joline, you're my sister and one of my best friends! Since we were young, we do a lot together. Although we are completely different persons, I really appreciate the way we support each other and are always there for each other. I really admire your kindness, your patience, and your way of always helping other people. Thank you for being such an important part of my life.

Tom, my cute little brother. I really enjoyed watching you grow up and becoming the great person you are today. I loved all the moments we spend together during your visit in London, but also in Amsterdam, at TD, going out with friends or just hanging out for a cup of coffee.

Friends

Dear Laura, Lianne, Ileen, Josefien, Jeroen, Laurence, Maarten and Richard, my DIXIES! Thank you for always supporting me and visiting me during my time in London. Over the last few years you have become great friends and I enjoy our yearly holiday together. It always feels like we are our small little family. Hopefully, there are many more holidays to come!

A special thanks to Ileen for designing the cover of my thesis. It is really inspiring how creative you are and how you are always happy to help us.

Dear Lilith, Fleur, Daniella and Katima, my ACTA chickies. I am grateful for our friendship, and really enjoy our holidays and moments together. I appreciate how you always support me and visited me in London.

Dear Charlotte, we have known each other since we were toddlers. Our families have been celebrating Christmas together ever since. I really enjoy our quality moments together and love our sauna dates. Thank you for being such a good friend.

Dear Joëlle, thank you for always being there for me and encouraging me. Although we don't see each other that often, I know that I can always count on you.

Dear Mark, I really enjoy that we both still work at ACTA. It is great to stay in touch with you. Thank you for supporting me and visiting me during my time in London. We shared some memorable moments.

Dear Julia, buuf! Ever since high school you are a great friend and I appreciate how we always stayed in touch. I really appreciate the sport dates and how we always discuss our research projects.

Dear Fran and Neil, thank you for your hospitality during my stay in London. You are both wonderful people.

Dear Michaela, you have been the best roommate I could wish for in London. Thank you for inviting me to all the fun hang-outs with your friends and thank you for making my time in London such an amazing experience.

I would also like to thank all my other friends, who are always there for me and always supporting me.

Finally, I would like to thank Dieter. I am very lucky to be with someone as loving, kind, intelligent, and caring as you are. Thank you for always supporting me and encouraging me to bring out the best in myself.
