CONTENTS
Establishing a learning health system in LMICs

Contents

Chapter 1. Introduction 1

Part 1. What are the barriers and enablers to evaluating and improving the quality of acute care in LMICS?

Chapter 2. Evaluation of the feasibility and performance of early warning scores to identify patients at risk of adverse outcomes in a low-middle income country setting. 9

Chapter 3. Determinants of recognition of the deteriorating patient in acute care wards. A qualitative study from a lower-middle-income setting. 37

Part 2. Can the components of a learning health system be implemented in LMICs?

Chapter 5. Addressing the information deficit in global health: lessons from a digital acute care platform in Sri Lanka. 71

Chapter 6. Pakistan Registry of Intensive CarE (PRICE): Expanding a lower middle-income, clinician-designed critical care registry in South Asia. 87

Chapter 7. A learning health systems approach to improving the quality of care for patients in South Asia. 97

Chapter 8. Closing the theory to practice gap for newly qualified doctors: Evaluation of a peer-delivered practical skills training course for newly qualified doctors in preparation for clinical practice. 111

Part 3. Can a learning system in an LMIC enable healthcare workers to undertake holistic, replicable evaluation of the quality of acute care, and identify setting specific priorities for improvement?

Chapter 9. Quality evaluation and future priorities for delivering acute myocardial infarction care in Sri Lanka. 129

Chapter 10. Outcomes and quality of recovery at one year following Percutaneous Coronary Intervention in Sri Lanka. 147
### Chapter 11. Discussion
