# Acknowledgements

The four years during which I have worked on this dissertation (from October 2016 until September 2020) have been memorable and highly rewarding, mainly because of the many great people that have supported me along the way. I am glad to have this opportunity to thank them!

First of all, I wish to thank my promotor and daily supervisor Jeroen van Dongen, who has given me many opportunities and shown a lot of trust in me over the past few years. Jeroen's conscientious supervision has enabled me to greatly improve my research and writing. I could not have wished for a more committed and knowledgeable supervisor. It has been a pleasure to work with and learn from Jeroen, and I hope that our paths will keep crossing in the future! I also wish to thank Rens Bod, my second promotor, and Bart Karstens, my co-promotor. Both have been a driving force behind my research. I wish to thank Rens and Bart in particular for encouraging me to ask

big questions, and for helping me to formulate sharp answers.

I have been based mainly at the University of Amsterdam, where I was a member of a number of very inspiring collectives. These included the NWO-funded "Flow of Cognitive Goods" research project, the Vossius Center for the History of Humanities and Sciences, and the Amsterdam Meetings in Philosophy and History of Gravitation (AmPHiG). In all of these groups, I was lucky to work together with fantastic colleagues. I am particularly grateful to Emma Mojet, with whom I have worked intensively over the past four years, and even before. It has been a privilege and a lot of fun to discover the history of the sciences and humanities together with Emma. I also want to thank Tom Kayzel, Jaco de Swart, and Chaokang Tai, my other close colleagues in Amsterdam, for all of their efforts, and for the many lively discussions that we have had, especially in the context of our PhD Journal Club.

I have had the opportunity to share my work with many brilliant and helpful scholars, also outside of Amsterdam. In December 2018, I was a visiting pre-doctoral fellow at department II of the Max Planck Institute for the History of Science in Berlin, and in November 2019, I was a visiting scholar at the History of Science research group at the History department of the LMU in Munich. I thank Lorraine Daston and Kärin Nickelsen for welcoming me there, as well as for highly useful advice. I experienced my stays in both Berlin and Munich as extremely inspiring, and for that I am thankful to everyone I met there and exchanged ideas with, including Julia Bloemer, Eric Gurevitch, Christoffer Leber, Edgar Lejeune, Caterina Schürch, and Claus Spenninger. I am especially grateful to Kristine Palmieri and Josephine Musil-Gutsch, not only for showing me around in Berlin and Munich, but also for enriching my studies into the historical intersections of the humanities and the natural sciences with lots of relevant ideas and perspectives.

With regard to the latter research theme, I have also benefited a lot from discussions with Jeroen Bouterse, Kasper Eskildsen, Fabian Krämer, Julia Kursell, Suzanne Marchand, and Herman Paul. For fruitful dialogues about Ernst Mach, I am indebted to Richard Staley, Elske de Waal, and Daan Wegener. I also want to thank Frans

van Lunteren, Omar Nasim, Kathryn Olesko, Floris Solleveld, and Paul Ziche for crucial input.

I have completed the manuscript of my dissertation at home, in Rotterdam, during a pandemic that made the pleasant academic conditions to which I had become used largely disappear. For their great support during this demanding period, and for their careful reading of the near-to-final drafts of the chapters of this thesis, I want to thank Thor Rydin, Jorrit Smit, and Alexander Stöger, and, again, Chaokang, Emma, Jaco, Kristine, Josephine, and Tom.

I also want to thank my loving family for their commitment. Mam, thank you for believing in me, and for always giving great advice. Pap, Anneloes, Anna, Bruno, Elena, thank you for your encouragement, and for all the nice moments together. Jos, Rob, Daniël, and Myrthe, thank you for the warm support. I also want to say thanks to my incredible friends: Roelof, Julie, and Nelleke (the TVrienden); Anner, Bas, Dirk, Gerrit, Jesse, Jippe, Marie Beth, Roland, Tania, and Thomas (my friends from Cineville); Alessandro, Bas, Boke, Emiel, Joris, Michel, Rêve, and Tycho (the infamous Eetclub); and of course Arnoud, Bonnie, Hein, Jesper, Jordi, Nick, Pip, Ramon, Roos, Sander, Solange, and Wike. Thank you all for the good times together, and for showing interest in my work every now and then.

I would like to end by thanking the love of my life and best friend of all, Anouk. Apart from always being there for me, she has put a lot of hard work into the design of this dissertation. Anouk, thank you for all your help, love, and understanding, and for being an endless source of inspiration.
