To Execute, Rewrite, and Debug

On the Construction and
Deconstruction of Computation

David Gauthier

To Execute, Rewrite, and Debug:
On the Construction and Deconstruction
of Computation

ACADEMISCH PROEFSCHRIFT

Ter verkrijging van de graad van doctor
aan de Universiteit van Amsterdam
op gezag van de Rector Magnificus
prof. dr. ir. K.I.J. Maex
ten overstaan van een door het College voor Promoties ingestelde
commissie, in het openbaar te verdedigen in de Agnietenkapel
op woensdag 20 januari 2021, te 13:00 uur

door

David Gauthier

geboren te Québec

Promotiecommissie

Promotor:	prof. dr. R. Boast	Universiteit van Amsterdam
	prof. dr. I. van der Tuin	Universiteit Utrecht
Overige leden:	prof. dr. W. Ernst	Humboldt-Universität zu Berlin
	prof. dr. E. de Freitas	Manchester Metropolitan University
	prof. dr. P.P.R.W. Pisters	Universiteit van Amsterdam
	dr. E.C. Brouwer	Universiteit van Amsterdam
	dr. J.G.C. de Bloois	Universiteit van Amsterdam

Faculteit der Geesteswetenschappen

The research of this doctoral dissertation received financial assistance from the Netherlands Institute for Cultural Analysis (NICA) through the Nederlandse Organisatie voor Wetenschappelijk Onderzoek (NWO) Graduate Programme.

À Martine

Acknowledgements

My first words of gratitude are for my promoters, Robin and Iris. Thank you for your support, patience, and guidance during this doctoral journey that started what seems like ages ago now. I will always have fond memories of our meetings and discussions at Café Luxembourg and the café of the Lloyd Hotel.

I sharpened my historical gaze on computing during this period with you, Robin. I say historical, but archeological might be a better qualifier. Our (sometimes quite long!) conversations about mechanisms, reckoning strategies, machine forms and their epochs, people, operators, and ideas throughout the ages sparked a latent interest in me—sharpened my gaze, as I said. I want to thank you for this as it helped me grow as a scholar and I hope we will continue our inspiring discussions in the years to come.

I also want to thank you, Iris, for all the kind and insightful advice you gave me along the way. I met many great and inspiring scholars because of you and was able to build a community around the type of scholarship I wish to pursue. I am also grateful for the critical feedback you gave me on this dissertation and for your support throughout my journey editing this manuscript. I can not emphasise enough what this meant to me and how inspiring of a character you are.

Next, I want to thank NICA for the opportunity it gave me to pursue my doctorate at the UvA. I am very proud to be part of NICA, and I have learned much from the various seminars organised over the past several years. I especially want to thank Murat and Eloë for their generous support throughout my degree. I am also grateful to be part of the incredible ASCA community of scholars. I vividly remember my first ASCA seminar and the anticipation I had when entering the room full of fellow PhDs. While I was a new ASCA member, I already knew ASCA members before arriving in Amsterdam and so, in that moment, felt I had finally arrived. I now had something in common with the “old school” members I knew—Anik, Adam, Eliza, Pepita, Aylin, Lara, Birkan, Melanie, Blandine, Marc. Being part of the “new school” was something special indeed. I had great fellow PhD colleagues—Melle, Geli, Asli, Eva, Natalia, Flora, Daniel, Ricarda, and many more—and even had a special crew with Jan and Halbe. I especially want to thank Blandine and Ricarda, who helped me make sense of the Dutch and German passages this dissertation cites. Going through a doctoral programme is not always easy and I doubt it would have been possible without the ASCA community. I am certain the friendships I was able to foster will last for years to come.

Speaking of friendship, coming to The Netherlands via Denmark from Canada to pursue my PhD felt like coming back home in a sense. Geoff, Marc, Mike—you were already

here! It is strange how after Banff, and then after Boston, we were all able to congregate again. I want to thank you all for putting up with me the last few years and being there when it really counts. I want to thank Michael for his wise academic advices and for the epic times we had in Berlin the last few years. I also want to thank Jacob and Jakob for your infallible friendship throughout the years—it means a lot to me indeed. As time will tell, the year 2020 will be remembered as an odd year. I am very grateful to have met Ward and Pierre-Yves, friends with whom I spent most of the year, and who kept me sane and thankfully distracted during these strange times.

Je veux remercier ma famille: ma maman et Guy, dont le support constant et l'amour ont toujours été des plus important pour moi; mon papa et Denise, qui a toujours été une grande source d'inspiration, et ce non seulement intellectuellement mais avant tout humainement; mes frères Nicolas et Alexandre-Charles qui sont les deux meilleurs frères du monde.

And finally, I can not end this acknowledgment without thanking you, Erin. Frankly, I do not think I could have done all of this without you. Your support and advice were paramount (to say the least). You are a true inspiration to me and I am extremely grateful you helped me through this thing.

Haarlem, December 2020

Table Of Contents

Introduction.....	1
Chapter 0: Turing's Machines.....	19
Chapter 1: Wittgenstein's Rules.....	37
Chapter 2: Inhuman Obligations.....	56
Chapter 3: On Commands and Executions.....	73
Chapter 4: Céline's Literary/War Machine.....	94
Chapter 5: Logic of Rules or Rules of Logic?.....	112
Chapter 6: Logical Realism and its Shadow: Constructivism.....	129
Chapter 7: On Rewriting Machines: Blank Signs and Types.....	154
Conclusion.....	179
Appendix A.....	195
Bibliography.....	196
Summary.....	208
Samenvatting.....	213
