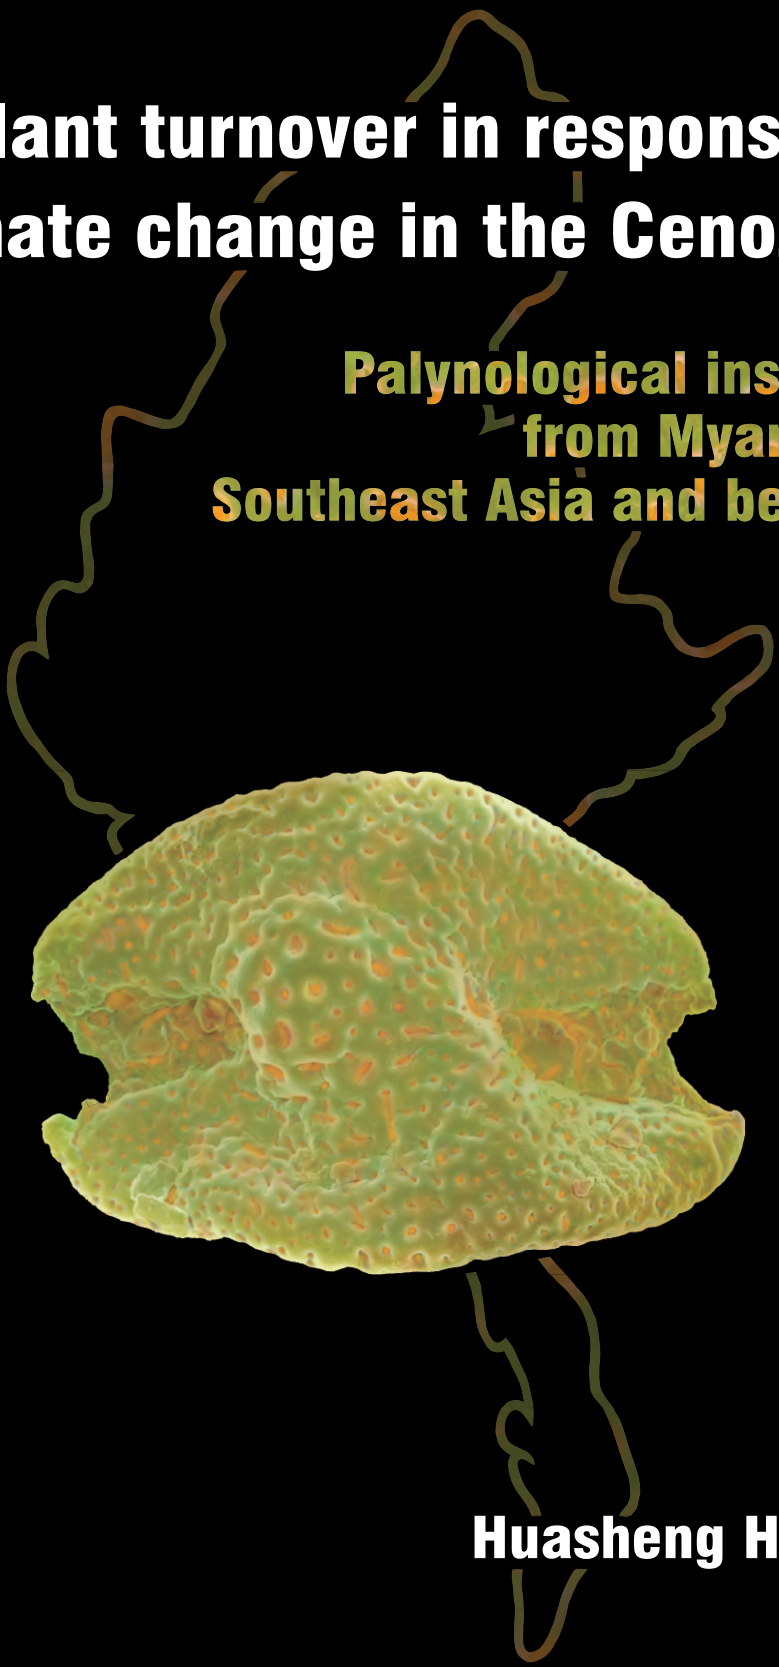
Plant turnover in response to climate change in the Cenozoic

Palynological insights from Myanmar, Southeast Asia and beyond



Huasheng Huang

Plant turnover in response to climate change in the Cenozoic:

Palynological insights from Myanmar, Southeast Asia and beyond

Huasheng Huang

Huang H. 2021. Plant turnover in response to climate change in the Cenozoic: Palynological insights from Myanmar, Southeast Asia and beyond
PhD thesis, University of Amsterdam, Amsterdam, The Netherlands
With summaries in English, Dutch and Chinese

Cover illustration: Map outline of Myanmar with a palm fossil pollen grain from Huang et al. (2020). This pollen grain belongs to *Dicolpopollis kalewensis*, derived from *Calamus*, which has a distribution across central Africa, and from South and Southeast Asia into tropical Australia.
Cover design: Limi Mao & Huasheng Huang
Printed by: ProefschriftMaken
ISBN: 978-94-91407-98-7

Plant turnover in response to climate change in the Cenozoic:

Palynological insights from Myanmar, Southeast Asia and beyond

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad van doctor
aan de Universiteit van Amsterdam
op gezag van de Rector Magnificus
prof. dr. ir. K.I.J. Maex
ten overstaan van een door het College voor Promoties ingestelde commissie,
in het openbaar te verdedigen in de Aula der Universiteit
op woensdag 17 juni 2021, te 16:30 uur

door Huasheng Huang
geboren te Guangdong

Promotiecommissie:

Promotor:	prof. dr. P.C. de Ruiter	Universiteit van Amsterdam
Copromotoren:	dr. M.C. Hoorn	Universiteit van Amsterdam
	dr. R.J. Morley	Palynova Ltd
Overige leden:	prof. dr. J. Sevink	Universiteit van Amsterdam
	prof. dr. P.H. van Tienderen	Universiteit van Amsterdam
	prof. dr. J.C.A. Joordens	Universiteit Maastricht
	prof. dr. P.A. Zuidema	Wageningen University & Research
	dr. rer. nat. W.D. Kissling	Universiteit van Amsterdam
	dr. C. Jaramillo	Smithsonian Tropical Research Institute

Faculteit: Faculteit der Natuurwetenschappen, Wiskunde en Informatica

The research published in this doctoral thesis was financially supported by the China Scholarship Council (grant 201604910677) and the University of Amsterdam. Additional funding came from the European Research Council Consolidator Grant MAGIC 649081 to Dr. Guillaume Dupont-Nivet, for the fieldworks in Myanmar and workshops in Potsdam, Germany.

CONTENTS

Chapter 1 | Introduction 7

Chapter 2 | At a crossroads: the late Eocene flora of central Myanmar owes its composition to colliding plate collision and tropical climate 33

Chapter 3 | Late Eocene vegetation and environmental dynamics under monsoonal climate in central Myanmar 103

Chapter 4 | Eocene palms from central Myanmar in a South-East Asian and Global perspective: evidence from the palynological record 137

Chapter 5 | Climate and geological change as drivers of Mauritiinae palm Biogeography 177

Chapter 6 | Diversity declines and range contraction of palms through the Cenozoic 209

Chapter 7 | General discussion and synthesis 231

Summaries in English, Dutch and Chinese 249
