ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad van doctor
aan de Universiteit van Amsterdam
op gezag van de Rector Magnificus
prof. dr. ir. K.I.J. Maex

ten overstaan van een door het College voor Promoties ingestelde commissie,
in het openbaar te verdedigen in de Aula der Universiteit
op woensdag 22 september 2021, te 14.00 uur

door Alberto Pérez de Alba Ortiz
geboren te Distrito Federal

Promotiecommissie

<i>Promotor:</i>	dr. ir. B. Ensing	Universiteit van Amsterdam
<i>Copromotor:</i>	prof. dr. E.J. Meijer	Universiteit van Amsterdam
<i>Overige leden:</i>	prof. dr. P.G. Bolhuis	Universiteit van Amsterdam
	prof. dr. H.M. Cuppen	Universiteit van Amsterdam
	dr. J. Vreede	Universiteit van Amsterdam
	prof. dr. H.J. Bakker	Universiteit van Amsterdam
	prof. dr. A. Laio	SISSA
	prof. dr. C. Rovira	Universitat de Barcelona

Faculteit der Natuurwetenschappen, Wiskunde en Informatica

This work was financially supported by the Mexican National Council for Science and Technology (CONACYT). This work was carried out on the Dutch national e-infrastructure with the support of SURF Cooperative, and in the Van 't Hoff Institute for Molecular Sciences at the University of Amsterdam.

Cover illustration: PathMap of the right- to left-handed helix transition channels in polyproline (see Chapter 5, Fig. 5.4). The color scheme is based on Mexican-flag green and Mexican pink.

Cover design: A. Pérez de Alba Ortíz.

A mi madre,

*No vale nada la vida,
la vida no vale nada,
comienza siempre llorando
y así, llorando se acaba.
Por eso es que en este mundo,
la vida, no vale nada.*

*Bonito León, Guanajuato,
la feria con su jugada,
allí se apuesta la vida
y se respeta al que gana.
Allá en mi León, Guanajuato,
la vida no vale nada.*

*Camino de Guanajuato
que pasas por tanto pueblo,
no pases por Salamanca
que ahí me hiere el recuerdo.
Vete rodeando veredas.
No pases, porque me muero.*

*El Cristo de tu montaña
del Cerro del Cubilete,
consuelo de los que sufren,
adoración de la gente.
El Cristo de tu montaña
del Cerro del Cubilete.*

*Camino de Santa Rosa,
la sierra de Guanajuato.
Allí nomás tras lomita
se ve Dolores Hidalgo.
Yo allí me quedo, paisano.
Allí es mi pueblo adorado.*

José Alfredo Jiménez

Contents

I	Introduction and methods	1
1	Introduction	3
1.1	Biomolecules: structure and function	4
1.1.1	Proteins	4
1.1.2	Nucleic Acids	6
1.1.3	Polysaccharides	7
1.2	Biomolecular dynamics simulations	8
1.2.1	State of the art	8
1.2.2	Future directions	9
1.3	This thesis	10
	References.	12
2	Methods	17
2.1	Statistical mechanics	18
2.2	Molecular dynamics simulations	19
2.2.1	Force fields	20
2.2.2	Density functional theory	21
2.2.3	Hybrid quantum mechanics/molecular mechanics.	23
2.3	Enhanced sampling.	23
2.3.1	Free-energy methods	24
2.3.2	Path-based free-energy methods	27
	References.	35
II	Bridging experiments and free-energy calculations of polysaccharides	43
3	The selective binding mechanism of ion-responsive rigidity in hyaluronan	45
3.1	Introduction.	46
3.2	Experimental results	47
3.2.1	Complexation of Ca^{2+} ions with hyaluronan	47
3.2.2	Effect of Ca^{2+} ions on the persistence length of hyaluronan	51
3.3	Computational results	53
3.3.1	Effect of Ca^{2+} ions on the atomic conformation of hyaluronan	53

3.4	Discussion	56
3.5	Conclusion	58
3.A	Appendix	59
3.A.1	Molecular dynamics	59
3.A.2	Constrained molecular dynamics.	61
	References.	65
III Developing and assessing parallel path-based free-energy calculations in oligopeptides		69
4	The zipper-like helix handedness transition of polyproline chains	71
4.1	Introduction.	72
4.2	System	73
4.3	Simulation protocol.	74
4.3.1	Molecular dynamics	74
4.3.2	Path-metadynamics.	75
4.3.3	Multiple-walker path-metadynamics	76
4.4	Results and discussion	77
4.5	Conclusions	81
4.A	Appendix	83
4.A.1	Path-steered molecular dynamics	83
4.A.2	PPI-to-PPII clockwise transition for the proline tetramer	84
