

DYNAMIC HYPERINTENSIONAL BELIEF REVISION—ERRATUM

AYBÜKE ÖZGÜN and FRANCESCO BERTO

DOI: [10.1017/S1755020319000686](https://doi.org/10.1017/S1755020319000686). Published online by Cambridge University Press,
21 July 2020

In the published version of this article [1] the value W was erroneously replaced with a lowercase w in footnote 2, in the sentence “This is rather standard in single-agent belief logics based on plausibility models as the possible worlds in W are taken to be epistemically possible ones which cannot be distinguished with absolute certainty”, as well as in the following sentence “By a finite model $\langle W, \geq, T, \oplus, b, t, v \rangle$, we mean a model in which both the set of possible worlds W and the set of possible topics T are finite” on page 800 of the article.

The publisher apologizes for the error.
