

Supporting Table 1

Table S1: Predictors from Poisson generalized mixed-effects model of damaging strikes. For fixed effects, shown are exponentiated coefficients, 95 percent confidence intervals, and P-values. For random terms, the standard deviation of the variance component is given. *Estimates and confidence intervals have been exponentiated

Type	Term	Estimate*	CI*	P-value	SD
Fixed	(Intercept)	0.208	[0.166, 0.261]	<0.001	-
Fixed	BMHI (scaled)	1.272	[1.109, 1.460]	0.001	-
Fixed	VIR (scaled)	1.391	[1.267, 1.528]	<0.001	-
Random	Year	-	-	-	0.206
