Data source: Statistics Netherlands, own calculations.

Note: Exponentiated coefficients. Bootstrapped standard errors in parentheses. Coefficients and standard errors estimated using the linear predictor approach (Breen, Karlson, and Holm 2021). Model 1 shows the controls-unadjusted gender gap. Model 2 controls for education, work experience, and tenure. Model 3 additionally adjusts for part-time factor, industry, and workplace size.

* $p < 0.05$, ** $p < 0.01$, *** $p < 0.001$
