Gull over-travels?
Consequences of diverse migration strategies in a generalist seabird

Morgan Brown
Gull over-travels? Consequences of diverse migration strategies in a generalist seabird. PhD thesis, Institute for Biodiversity and Ecosystem Dynamics, University of Amsterdam, The Netherlands

This thesis was supported by a Alexander Graham Bell Canada Graduate Scholarship awarded to Morgan Brown by the Natural Sciences and Engineering Research Council of Canada (PGSD3-503551-2017). A grant from the Ecology Fund awarded to Morgan Brown by the Royal Netherlands Academy of Arts and Sciences was used to purchase heart rate loggers (KNAWWF/807/19004).

All data and scripts used to produce results in this these are archived in the IBED Institutional Data Repository on research drive according to the IBED Research Data Archiving Requirements (V1).

Consequences of diverse migration strategies in a generalist seabird

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad van doctor
aan de Universiteit van Amsterdam
op gezag van de Rector Magnificus
prof. dr. ir. K.I.J. Maex
ten overstaan van een door het College voor Promoties ingestelde commissie,
in het openbaar te verdedigen in de Agnietenkapel
op dinsdag 5 april 2022, te 15.00 uur

door Jennifer Morgan Brown
geboren te Milton
Promotiecommissie

Promotores: prof. dr. J.Z. Shamoun-Baranes Universiteit van Amsterdam
            prof. dr. ir. W. Bouten Universiteit van Amsterdam

Overige leden: prof. dr. A.M. de Roos Universiteit van Amsterdam
               prof. dr. B.A. Nolet Universiteit van Amsterdam
               dr. I.M. Smallegange Universiteit van Amsterdam
               dr. ir. E.E. van Loon Universiteit van Amsterdam
               prof. dr. T. Piersma Rijksuniversiteit Groningen
               dr. K.H. Elliott McGill University
               dr. S.C. Patrick University of Liverpool

Faculteit der Natuurwetenschappen, Wiskunde en Informatica
Contents
Chapter 1. General Introduction

Chapter 2. Long-distance migrants vary migratory behaviour as much as short-distance migrants: an individual-level comparison from a seabird species with diverse migration strategies

Supplementary Materials for Chapter 2

Chapter 3. Acceleration as a proxy for energy expenditure in a facultative-soaring bird: comparing dynamic body acceleration and time-energy budgets to heart rate

Supplementary Materials for Chapter 3

Chapter 4. Migrating further does not affect annual energy expenditure but increases variation in daily energy expenditure in lesser black-backed gulls

Supplementary Materials for Chapter 4

Chapter 5. Equal survival and reproductive parameters between short- and long-distance migrating lesser black-backed gulls

Supplementary Materials for Chapter 5

Chapter 6. Consequences of diverse migration strategies: A synthesis
