STUDIES ON INFLAMMATORY BOWEL DISEASE AND FUNCTIONAL GASTROINTESTINAL DISORDERS
IN CHILDREN AND ADULTS
Studies on inflammatory bowel disease and functional gastrointestinal disorders in children and adults

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad van doctor
aan de Universiteit van Amsterdam
op gezag van de Rector Magnificus
prof. dr. ir. K.I.J. Maex
ten overstaan van een door het College voor Promoties ingestelde commissie,
in het openbaar te verdedigen in de Agnietenkapel

op dinsdag 20 december 2016, te 12:00 uur

door

Daniël Robin Hoekman
geboren te Amsterdam
Promotiecommissie

Promotores:    Prof. dr. M.A. Benninga    Universiteit van Amsterdam
               Prof. dr. G.R.A.M. D’Haens    Universiteit van Amsterdam

Copromotores: Dr. M. Löwenberg    Universiteit van Amsterdam
               Dr. A.M. Vlieger    St. Antonius Ziekenhuis

Overige leden: Prof. dr. J.C. Escher    Erasmus Universiteit Rotterdam
               Prof. dr. H.S.A. Heymans    Universiteit van Amsterdam
               Prof. dr. A.J.P.M. Smout    Universiteit van Amsterdam
               Dr. P.C.F. Stokkers    St. Lucas Andreas Ziekenhuis
               Prof. dr. F.A. Wijburg    Universiteit van Amsterdam
               Prof. dr. N.J. de Wit    Universiteit Utrecht

Faculteit der Geneeskunde
# TABLE OF CONTENTS

**CHAPTER 1**  
Introduction and outline  

**Part I  Functional gastrointestinal disorders**

**CHAPTER 2**  
Annual costs of care for pediatric irritable bowel syndrome, functional abdominal pain, and functional abdominal pain syndrome  

**CHAPTER 3**  
The placebo response in pediatric abdominal pain-related functional gastrointestinal disorders; a systematic review and meta-analysis  

**CHAPTER 4**  
Functional constipation in childhood: current pharmacotherapy and future perspectives  

**CHAPTER 5**  
Polyethylene glycol 3350 with electrolytes versus polyethylene glycol 4000 without electrolytes for childhood constipation: A randomized controlled trial  

**Part II  Inflammatory bowel diseases**

**CHAPTER 6**  
The association of infliximab trough levels with disease activity in pediatric inflammatory bowel disease  

**CHAPTER 7**  
Prediction of infliximab trough levels based on measurements of intermediate serum concentrations  

**CHAPTER 8**  
Long-term outcome of early combined immunosuppression versus conventional management in newly diagnosed Crohn’s disease  

**CHAPTER 9**  
Patterns of anti-TNF use and associated treatment outcomes in inflammatory bowel disease patients: results from an analysis of Dutch health insurance claims data  

**CHAPTER 10**  
A survey of patient reported outcome measures in Crohn’s disease  

**CHAPTER 11**  
Relationship of clinical symptoms with biomarkers of inflammation in pediatric inflammatory bowel disease  

**CHAPTER 12**  
Fecal calprotectin accurately predicts symptomatic relapse in children and adolescents with inflammatory bowel disease in clinical remission  

**CHAPTER 13**  
Case report of cheilitis granulomatosa and joint complaints as presentation of Crohn’s disease
Part III  Inflammatory bowel diseases and functional gastrointestinal disorders

CHAPTER 14  The prevalence of irritable bowel syndrome-type symptoms in pediatric inflammatory bowel disease and the relationship with biochemical markers of disease activity

CHAPTER 15  Prevalence of irritable bowel syndrome-type symptoms in inflammatory bowel disease in remission

CHAPTER 16  Hypnotherapy for irritable bowel syndrome-like symptoms in patients with quiescent inflammatory bowel disease: a randomized, controlled trial

APPENDICES  Summary, discussion and future perspectives
