FACTOR VII-ACTIVATING PROTEASE:

UNRAVELING THE RELEASE AND REGULATION OF
DEAD CELL NUCLEAR DAMPS

GERBEN MARSMAN

The research described in this thesis was performed at the Department of Immunopathology of Sanquin Research (Amsterdam, The Netherlands). Financial support was provided by Sanquin, by the Landsteiner Foundation for Blood Transfusion Research (LSBR 0817), and by an unrestricted grant that Prof. dr. Sacha Zeerleder received from Viropharma. The printing of this thesis was financially supported by Sanquin Research and GaP Verlag.

Cover: "Skull Buttons", by Gerben Marsman. Original button artwork by Clare McCann. The buttons represent dying cells which release their chromatin into the extracellular environment.

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad van doctor

aan de Universiteit van Amsterdam

op gezag van de Rector Magnificus

prof. dr. ir. K.I.J. Maex

ten overstaan van een door het College voor Promoties ingestelde commissie,

in het openbaar te verdedigen in de Agnietenkapel

op donderdag 12 januari 2017, te 12:00 uur

door

Gerben Marsman

geboren te Zwolle

Promotiecommissie

Promotores: Prof. dr. S.S. Zeerleder Universiteit van Amsterdam
 Prof. dr. S.M. van Ham Universiteit van Amsterdam

Copromotor: Dr. B.M. Luken Sanquin Research

Overige leden: Prof. dr. C.E. Hack Universiteit Utrecht
 Dr. M. Heger Academisch Medisch Centrum
 Prof. dr. T.W. Kuijpers Universiteit van Amsterdam
 Prof. dr. J.C.M. Meijers Universiteit van Amsterdam
 Prof. dr. T. van der Poll Universiteit van Amsterdam
 Prof. dr. A. Zychlinsky Humboldt-Universität zu Berlin

Faculteit der Geneeskunde

TABLE OF CONTENTS

CHAPTER 1	General introduction and scope of this thesis	9
CHAPTER 2	Histones, cell-free DNA, or nucleosomes: the immunity of extracellular chromatin unraveled	29
CHAPTER 3	Cooperation of Factor VII-activating protease and serum Deoxyribonuclease I in release of nucleosomes from necrotic cells	53
CHAPTER 4	FSAP-mediated nucleosome release from late apoptotic cells is inhibited by autoantibodies present in SLE	73
CHAPTER 5	DNA and Factor VII-activating protease protect against the cytotoxicity of histones	97
CHAPTER 6	Factor VII-activating protease mediates the degradation of HMGB1	127
CHAPTER 7	Cellular RNA and histones play synergistic but distinct roles in FSAP activation induced by dead cells in serum	151
CHAPTER 8	Summarizing discussion	175
APPENDIX		195
	English summary	196
	Nederlandse samenvatting	200
	List of publications	204
	List of co-authors and their contribution to the manuscript	205
	Portfolio	207
	Curriculum Vitae	210
	Dankwoord	211
