DEVELOPMENTS IN DIAGNOSIS AND TREATMENT OF OBSTRUCTIVE SLEEP APNEA

“The only physiological method to reduce sleepiness is to sleep”

Pien Bosschieter

FUNDING

The conducted research in this thesis and the publication of this thesis has financially been made possible by:

- ACTA 
- Airway management 
- Apneuvereniging 
- Inspire 
- Mylan 
- Nyxoah 
- Nederlandse vereniging voor slaap- en waakonderzoek (NSWO) 
- OLVG 
- Somnomed 
- Slaapgeneeskunde vereniging Nederland (SVNL) 
- Vivisol 

ISBN: 978-94-6458-194-2

TABLE OF CONTENTS

CHAPETR 1	General introduction and thesis outline	7
CHAPTER 2	Predicting upper airway collapse sites found in drug-induced sleep endoscopy from clinical data and snoring sounds in obstructive sleep apnea patients: a prospective clinical study	33
CHAPTER 3	Do dental parameters predict severity of obstructive sleep apnea and mandibular advancement device therapy outcomes? A pilot study.	59
CHAPTER 4	Position-dependent obstructive sleep apnea and its influence on treatment success of mandibular advancement devices.	75
CHAPTER 5	The predictive value of drug-induced sleep endoscopy for treatment success with a mandibular advancement device or positional therapy for patients with obstructive sleep apnea.	91
CHAPTER 6	An interim oral appliance as a screening tool during drug-induced sleep endoscopy to predict treatment success with a mandibular advancement device for obstructive sleep apnea.	107
CHAPTER 7	Equal effect of a non-custom versus a custom mandibular advancement device in treatment of obstructive sleep apnea.	123
CHAPTER 8	Similar effect of hypoglossal nerve stimulation for obstructive sleep apnea in five disease severity categories.	147
CHAPTER 9	Daytime polysomnography to perform titration for upper airway stimulation in patients with obstructive sleep apnea.	167
CHAPTER 10	Discussion and future perspectives	187
CHAPTER 11	Summary/samenvatting	193
APPENDICES	Abbreviations	202
	PhD portfolio	205
	Author contributions	210
	Dankwoord	212
