You will be contacted as soon as possible.
Contents

1 Introduction
   1.1 Risk ....................................... 1
   1.2 Credit Risk Modeling ............................. 4
   1.3 Credit Derivatives ............................... 12
   1.4 Modeling Credit Derivatives ......................... 16
   1.5 Credit Crisis .................................. 22
   1.6 Outline ..................................... 23

2 A Filtering Problem with Applications to Credit Risk  
   2.1 Introduction .................................. 25
   2.2 Model and Background ........................... 27
   2.3 The Filtering Problem ............................. 29
   2.4 Filtering Between Jumps ........................... 33
   2.5 Filtering at Jump Times and a General Solution .............. 38
   2.6 Remarks on Model Extensions ........................ 47
### Contents

#### 3 Sample Path Large Deviations in Credit Risk
- 3.1 Introduction .................................. 51
- 3.2 Notation and Definitions ........................... 53
- 3.3 A Sample-Path Large Deviation Result ................... 56
- 3.4 Exact Asymptotic Results .......................... 66
- 3.5 Discussion and Concluding Remarks ................. 72
- 3.6 Background Results .............................. 74

#### 4 An Empirical Analysis of CDO Data
- 4.1 Introduction .................................. 77
- 4.2 Synthetic CDO Tranches ........................... 79
- 4.3 Modeling Default Dependency ....................... 83
- 4.4 Data ....................................... 89
- 4.5 Empirical Analysis .............................. 92
- 4.6 Conclusion ................................... 100
- 4.7 Regression Results: Quotes Regressed on Reference Spread ...... 101
- 4.8 Base Correlations ............................... 102
- 4.9 Performance of Mapping Methods ..................... 103

#### 5 Pricing CDO Tranches with Factor Copula Models
- 5.1 Introduction .................................. 105
- 5.2 Credit Derivatives ............................... 107
- 5.3 Pricing Credit Derivatives .......................... 108
- 5.4 Factor Copula Models ............................ 111
- 5.5 Approach .................................... 118
- 5.6 Results ..................................... 122
- 5.7 Concluding Remarks ............................. 130
- 5.8 The Levenberg-Marquardt Algorithm .......... 131
- 5.9 Figures ..................................... 133

#### Summary

#### Samenvatting

#### Bibliography
