If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, P.O. Box 19185, 1000 GD Amsterdam, The Netherlands. You will be contacted as soon as possible.

Contents

Contents	v
1 Introduction	1
1.1 Computer Networks	1
1.2 e-Science Applications	2
1.3 Hybrid Networking	4
1.4 Military Networks	5
1.5 Management of Computer Networks	7
1.6 Research Overview	8
1.6.1 Thesis Outline	11
I The Network Description Language	13
2 Describing Computer Networks	15
2.1 Introduction	15
2.2 Requirements for a Network Model	16
2.3 Information Models	17
2.3.1 Comparing Information Models	20
2.4 Topology Descriptions in Routing Protocols	21
2.5 Data Models	22
2.5.1 Introduction to the Semantic Web	22
2.5.2 Resource Description Framework	23
2.5.3 RDF Schemata	25
2.5.4 Distributed Repositories	26

2.5.5	Comparing XML and RDF	26
2.6	Conclusion	28
3	The Network Description Language	31
3.1	Introduction	31
3.2	Terminology for Computer Networks	32
3.3	The Network Description Language	34
3.4	Extending the Network Description Language	38
3.5	The Multi-Layer Network Description Language	41
3.5.1	NDL Topology Schema	41
3.5.2	NDL Layer Schema	43
3.5.3	NDL Capability Schema	48
3.5.4	Domain Schema	49
3.5.5	Technology Independence	49
3.5.6	Comparing NDL and GMPLS	51
3.6	Conclusion	52
4	NDL Applications	55
4.1	Introduction	55
4.2	Network Graph Generation	56
4.3	Automatic Generation of Network Descriptions	57
4.3.1	Topology Generation for TITAAN	59
4.3.2	Topology Generation from OSPF-TE	59
4.4	Extracting Data from Network Descriptions	60
4.4.1	Lightpath Planning in SURFnet6	61
4.4.2	Lightpath Planning in GLIF	62
4.4.3	Lightpath Monitoring in NetherLight	63
4.5	Python NDL Toolkit	65
4.6	Virtual Network Experiments	65
4.7	Conclusion	66
II	Topology Aggregation in Multi-Domain Networks	69
5	Introduction to Network Topology Aggregation	71
5.1	Introduction	71
5.1.1	Hierarchical Routing	72

5.2	Topology Aggregation	74
5.3	Performance Evaluation of Topology Aggregation	75
5.3.1	Performance Evaluation Study by Guo and Matta	75
5.3.2	Performance Evaluation Study by Awerbuch et al.	76
5.3.3	Aggregated Topologies in Optical Networks	78
5.4	Summary	80
6	Emulations of Aggregated Network Topologies	81
6.1	Introduction	81
6.2	Aggregation Methods	82
6.2.1	Formal Definitions of Topology Aggregation	83
6.2.2	Topology Aggregation from NDL Descriptions	85
6.3	Experimental Setup	86
6.3.1	Generating the Graphs and Pairs	87
6.3.2	Pathfinding Using Aggregations	88
6.4	Results of the Emulations	89
6.4.1	Fit Functions	90
6.4.2	Domain Sizes	92
6.4.3	Results on Inter-Domain Pathfinding	96
6.5	Discussion and Conclusion	100
7	Summary and Conclusion	105
7.1	The Road Ahead	107
7.1.1	RDF Infrastructure Descriptions	107
7.1.2	Topology Aggregation	108
A	Translation of OSPF to NDL	111
B	Translation of OSPF-TE to NDL	121
C	List of Abbreviations	133
	List of Author's Publications	137
	Bibliography	139
	Summary	149
	Samenvatting	151
