If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: http://uba.uva.nl/en/contact, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.
Contents

Chapter 1
General introduction and outline of this thesis

Chapter 2
Replication competent HIV-1 quasispecies obtained via clonal virus isolation from peripheral blood mononuclear cells is genetically highly similar to the contemporaneous HIV-1 quasispecies in plasma
Manuscript in preparation

Chapter 3
Limited evolution of HIV-1 subtype B in the early phase of infection
Submitted for publication

Chapter 4
Molecular evolution of human immunodeficiency virus type 1 upon transmission between human leukocyte antigen disparate donor-recipient pairs
PLoS ONE, 2008, 6(3): e2422

Chapter 5
Viral replication capacity as a correlate of HLA B57/B5801-associated nonprogressive HIV-1 infection
Journal of Immunology, 2007, 179:3133–3143

Chapter 6
A nonprogressive clinical course in HIV-infected individuals expressing human leukocyte antigen B57/5801 is associated with preserved CD8 T lymphocyte responsiveness to the HW9 epitope in Nef
Journal of Infectious Diseases, 2008, 197:871–879

Chapter 7
The relation between HLA B*5701, HCP5 and HIV-infection
Manuscript in preparation
Chapter 8
Persistence of HIV-1-specific CTL responses restricted by both protective and non-protective HLA alleles during HIV-1 disease progression
Manuscript in preparation

Chapter 9
Adaptation of HIV-1 to the human immune system at the population level is driven by protective HLA B alleles
Manuscript in preparation

Chapter 10
Recovery of viremic control after superinfection with pathogenic HIV type 1 in a long-term elite controller of HIV type 1 infection
Journal Clinical Infectious Diseases, 2008 47(11): e86-89

Chapter 11
Evolution of CCR5 using human immunodeficiency virus type 1 in relation to CCR5Δ32 host genetic background
Manuscript in preparation

Chapter 12
The presence of the Trim5α escape mutation H87Q in the capsid of late stage HIV-1 variants is preceded by a prolonged asymptomatic infection phase

Chapter 13
Discussion: Cytotoxic T lymphocyte responses in HIV-1-infected long-term nonprogressors: lessons for vaccine design
Future HIV Therapy, 2008, 2:351-361
