# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Strongly interacting electron systems . . . . .	1
1.2	The Hubbard model . . . . .	1
1.3	Hard-core spinless fermions . . . . .	2
1.4	Supersymmetric models for lattice fermions . . . . .	3
1.5	This thesis . . . . .	5
1.6	Outline . . . . .	5
<b>2</b>	<b>A supersymmetric model for lattice fermions</b>	<b>7</b>
2.1	The model . . . . .	7
2.1.1	Supersymmetry . . . . .	7
2.1.2	Witten index . . . . .	8
2.1.3	Lattice fermions . . . . .	8
2.1.4	Example: 6-site chain . . . . .	9
2.2	Relation to independence complex and (co)homology theory . . . . .	11
2.2.1	Independence complex . . . . .	12
2.2.2	Cohomology and homology theory . . . . .	12
2.2.3	The 'tic-tac-toe' lemma . . . . .	13
2.2.4	Examples: 6-site periodic and 4-site open chain . . . . .	14
<b>3</b>	<b>Superconformal field theory</b>	<b>15</b>
3.1	Continuum theory . . . . .	15
3.2	Conformal field theory . . . . .	15
3.3	$\mathcal{N} = 2$ Superconformal field theory . . . . .	16
3.4	Minimal series . . . . .	18
3.5	Superpartners and Witten index . . . . .	18
3.6	Spectral flow . . . . .	20
<b>4</b>	<b>The supersymmetric model on the one dimensional chain</b>	<b>21</b>
4.1	Introduction . . . . .	21
4.2	Hamiltonian . . . . .	21
4.3	Witten index . . . . .	21
4.3.1	Transfer matrix . . . . .	22
4.3.2	Ground state momenta . . . . .	23
4.4	Cohomology . . . . .	24
4.5	Bethe Ansatz solution in continuum limit . . . . .	25
4.6	Relation to other models . . . . .	25

4.6.1	A family of supersymmetric models . . . . .	26
4.6.2	The XXZ Heisenberg spin chain . . . . .	26
4.6.3	A supersymmetric matrix model . . . . .	27
4.7	Free boson with $\mathcal{N} = (2, 2)$ supersymmetry . . . . .	28
4.7.1	Spectrum . . . . .	29
4.7.2	Lattice operators: fermion number and momentum . . . . .	32
4.7.3	Highest weight state and descendants . . . . .	34
4.7.4	Partition sum . . . . .	36
4.7.5	Fermi velocity . . . . .	38
4.7.6	Chain of length $L = \pm 1 \pmod{3}$ . . . . .	38
4.7.7	Finite size spectra . . . . .	39
4.8	Spectral flow . . . . .	40
4.8.1	Spectral flow in finite size spectra . . . . .	45
4.9	Open boundary conditions . . . . .	47
4.9.1	Continuum theory . . . . .	47
4.9.2	One-point functions . . . . .	51
4.10	Entanglement entropy . . . . .	56
<b>5</b>	<b>The supersymmetric model on two dimensional lattices</b>	<b>59</b>
5.1	Superfrustration . . . . .	59
5.2	Exact results for the cohomology of $Q$ on two-dimensional lattices . . . . .	60
5.2.1	Martini lattice . . . . .	61
5.2.2	Octagon-square lattice . . . . .	62
5.2.3	Graphs with extra sites on the links . . . . .	63
5.3	Triangular and hexagonal lattice . . . . .	64
5.3.1	Numerical results for Witten index . . . . .	64
5.3.2	Bounds on the size and dimension of the homology of $Q$ . . . . .	65
5.4	Square lattice . . . . .	68
<b>6</b>	<b>Ground states of the square lattice related to rhombus tilings</b>	<b>73</b>
6.1	Introduction . . . . .	73
6.2	Outline of the proof . . . . .	74
6.3	The cohomology of $Q$ on the chain . . . . .	74
6.4	Part I: Tilted rectangles and cylinders . . . . .	76
6.5	Part II: The torus . . . . .	78
6.5.1	A special case: $S_2$ consisting of 1 chain . . . . .	79
6.5.2	The general case: $S_2$ consisting of $p$ chains . . . . .	86
6.6	Counting formula for tilings . . . . .	106
<b>7</b>	<b>The supersymmetric model on 2 and 3 leg ladders</b>	<b>111</b>
7.1	Ladder models as a first step towards 2D systems . . . . .	111
7.2	Ground states and tilings . . . . .	111
7.2.1	Kagome ladder . . . . .	112
7.2.2	Ladder realizations of the square lattice . . . . .	114
7.3	Spectral flow for ladder realizations of the square lattice . . . . .	117
7.4	Zig-zag ladder . . . . .	120
7.4.1	Exact ground states at and near quarter filling . . . . .	122

---

7.4.2	Entanglement entropy . . . . .	123
7.4.3	Charge order at quarter and one fifth filling . . . . .	124
7.4.4	Flat band . . . . .	127
7.4.5	Mapping to spin chain . . . . .	127
7.5	Square ladder . . . . .	129
7.5.1	First guess for the continuum theory . . . . .	129
7.5.2	Other $c = 3/2$ theories . . . . .	136
<b>8</b>	<b>Discussion and outlook</b>	<b>139</b>
8.1	Quantum criticality . . . . .	139
8.2	Ground states and tilings . . . . .	140
8.2.1	Edge modes in the square lattice . . . . .	140
8.2.2	Octagon-square lattice . . . . .	141
8.2.3	Bulk criticality . . . . .	142
8.3	Extensions of the supersymmetric model . . . . .	142
8.4	Superfrustration and black holes . . . . .	143
	<b>Bibliography</b>	<b>145</b>
	<b>Summary</b>	<b>151</b>
	<b>Samenvatting</b>	<b>153</b>
	<b>Dankwoord</b>	<b>157</b>
