Huibregtse IL, Braat H, van Laer K, te Velde AA, Rottiers P, van Deventer SJH Mucosal delivery of Ovalbumin by the Genetically Modified Lactococcus lactis suppresses inflammatory T Cell Responses in DO11.10 Mice *GUT* vol.54 (suppl VII) A2, October 2005

Huibregtse IL, Braat H, McGuirk P, Kate FT, Dunne P, Hommes D, Deventer S, Mills K. Protection against experimental colitis by filamentous hemagglutinine a of bordetella pertussis is not exclusively mediated by IL-10 *Gastroenterology* 130 (4): A343-A343 Suppl. 2 APR 2006

Huibregtse IL, Braat H, Snoeck V, De Creus A, de Jong EC, van Deventer SJH and Rottiers P Mucosal delivery of ovalbumin by thie genetically modified Lactococcus lactis suppresses T cell responses in DO11.10 mice *Inflammatory Bowel Diseases* 12: S21-S21 Suppl. 2 APR 2006
List of publications

Protection against experimental colitis by filamentous hemagglutinin A of Bordelella pertussis is not exclusively mediated by interleukin-10 *Inflammatory Bowel Diseases 12: S21-S21 Suppl. 2 APR 2006*

Prevention of experimental colitis by parenteral administration of a pathogen-derived immunomodulatory molecule *GUT 56 (3): 351-357 MAR 2007*

**Huibregtse IL**, van Lent AU, van Deventer SJ.
Regulatory T cells in GI disease and their exploitation in therapy. Immunopathogenesis of IBD: insufficient suppressor function in the gut? *GUT 2007 Apr;56(4):584-92*

**Huibregtse IL**, Snoeck V, De Creus A, Braat H, de Jong EC, van Deventer SJH and Rottiers P.

**Huibregtse IL**, Snoeck V, Braat H, de Jong EC, van Deventer SJH and Rottiers P.
Induction of antigen-specific tolerance by oral administration of *Lactococcus lactis* delivered antigen *Gastroenterology 132 (4): A231-A231 Suppl. 2 APR 2007*

**Huibregtse IL**, Van Capel T, Braat H, van Deventer SJH, de Jong EC Lactococcus lactis modulates T-cells through an antigen-specific effect on dendritic cells *Gastroenterology 132 (4): A708-A708 Suppl. 2 APR 2007*

**Huibregtse IL**, Marietta EV, Rashtak S, David C, Rottiers P, van Deventer SJH, Murray J
Induction of antigen specific oral tolerance by genetically modified Lactococcus lactis delivering DQ8-specific immunodominant gliadin epitopes to gluten-sensitized class II transgenic mice *Clinical Immunology, Volume 123, suppl 2007, S53*

Tolerance to gliadin peptides can be restored by enteral administration of Lactococcus lactis bioengineered to deliver the immunodominant antigen to sensitized NOD Abo DQ8 transgenic mice. *Eur Journal of Gastroenteroly and Hepatology Jul 2008 Volume:20 Issue:7, A59.*
