1 Introduction

Since early 2007, the ISCO2008 draft 3 version of the EurOccupations database has been used for the response to the survey question "What is your occupation" in the WageIndicator web-survey. Before that period, ISCO1988 has been used. This web-survey is posted on frequently visited websites in an increasing number of countries in Europe and outside Europe. For more information see www.wageindicator.org.

The WageIndicator has been used to produce summary measures of age group by occupation for six of the eight EurOccupations countries. For this purposes, the ISCO2008 draft 3 have been recoded to the ISCO2008 final codes, and subsequently the 3-digit codes have been used in the analyses. Similarly, ISCO1988 has been recoded to the ISCO2008 final codes. In total 127,605 observations have been used in this analysis (in the remaining, the 162 observations from France have been excluded). The table hereafter shows the overall percentages across age groups per country.

The Table at the next page reveals the distribution over age groups per occupational minor group (3-digit) per country. It shows, not surprisingly, that the distribution over age groups varies substantially across the occupational groups. Information on the number of observations per occupational group per country is provided in EurOccupations Deliverable D01e.
