LIST OF TABLES

Table 2.1. Employees in dependent employment in the Netherlands in 2002, and collective agreement coverage rates. .......................................................... 23
Table 2.2. FNV Trade unions with member counts. ................................................ 27
Table 3.1. Descriptives for the dependent variables. ........................................... 57
Table 3.2. Descriptives for independent variables. ............................................ 59
Table 3.3. Percentages of collective agreements that contain specific work-family provisions, and number of employees, working 12 hours or more per week, who can make use of these provisions through the CLA.......................... 60
Table 3.4. Male and female FNV negotiators per branch of industry. ............... 62
Table 3.5. Odds ratios of the influence of the share of female employees on each of the five work-family provisions. ........................................... 63
Table 3.6. Odds ratios of the influence of the gender of the main trade union negotiator on each of the five work-family provisions. ............................ 63
Table 3.7. Regression models predicting the simple work-family score [0 – 5] in collective labour agreements............................................................ 66
Table 3.8. Additional regression model predicting the simple work-family score [0 – 5] in collective labour agreements. ............................................. 68
Table 3.9. Additional regression model predicting the simple work-family score [0 – 5] in collective labour agreements. ............................................. 69
Table 3.10. Additional logistic regression models predicting the presence of a work-family provision (Model 3d) and the presence of a parental/paternal/maternity work-family provision (Model 3e) in collective labour agreements.......................................................... 70
Table 3.11. The precise work-family score and its components. ....................... 72
Table 3.12. Distribution of points for the part-time provision sub-item. ........ 74
Table 3.13. Distribution of points for the childcare provision sub-item. .......... 75
Table 3.14. Distribution of points for the paternity leave provision sub-item. ..... 75
Table 3.15. Distribution of points for the pregnancy / maternity leave provision sub-item. .......................................................... 76
Table 3.16. Distribution of points for the parental leave provision sub-item. .... 76
Table 3.17. Regression models predicting the precise work-family score [0 – 100] in collective labour agreements......................................................... 77
Table 3.18. Regression model predicting the precise work-family score [0 – 100] in collective labour agreements (company CLAs only). ......................... 78
Table 4.1. Distribution of FNV industry groups in the sample, including average agenda work-family scores. .......................................................... 88
Table 4.2. Allocation of points to compute the agenda work-family score, divided by type of work-family provision (columns) and type of proposal (rows). 96
Table 4.3. Distribution of work-family provisions on the trade unions’ agendas. ................................................................. 102
Table 4.4. Descriptives of the share of women the work-family scores in the preceding CLA. ......................................................... 105
Table 4.5. The importance of the work-family issue in the FNV central recommendations. .......................................................... 108
Table 4.6. Trade unions in the sample. .............................................. 108
Table 4.7. Distribution of FNV industry groups in the sample, including average agenda work-family scores. ........................ 109
Table 4.8. Overview of the regression results. ............................... 110
Table 4.9. Relationship between central and decentralised policy on work-family issues. .............................................................. 114
Table 5.1. Number of FNV negotiators (and their bargaining agendas) in the bargaining agenda sample, categorised by share of female employees and WFb-score in the CLA. ................................................................. 128
Table 5.2. Interviewee details. ........................................................... 129
