Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <http://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

Contents

Acknowledgments	vii
1 General Introduction and Overview	1
1.1 Endogenous regressors	1
1.2 Some practical research questions	4
1.3 Overview of this thesis	5
2 The asymptotic and finite sample (un)conditional distributions of OLS and simple IV in simultaneous equations	9
2.1 Introduction	9
2.2 Model, estimators and standard asymptotics	13
2.3 The asymptotic distribution of inconsistent OLS	15
2.4 Measures for estimator accuracy	21
2.5 Pictured parametrizations	25
2.5.1 A basic static IID model	26
2.5.2 Actual findings	30
2.6 Conclusions	34
3 On the limiting and empirical distribution of IV estimators when some of the instruments are invalid	41
3.1 Introduction	41
3.2 Model, assumptions and theorems	46
3.3 Illustrations	55
3.3.1 A simple just identified model	57

3.3.2	A simple overidentified model	66
3.4	Conclusions	71
3.5	Appendix	73
4	Evaluating the performance of tests of overidentifying restrictions	97
4.1	Introduction	97
4.2	Test statistics for overidentifying restrictions	99
4.2.1	GMM statistics	99
4.2.2	GEL statistics	104
4.3	Bootstrap procedures	105
4.3.1	HH type bootstrap	106
4.3.2	EL type bootstrap	110
4.3.3	Residual type bootstrap	111
4.4	Illustrations	113
4.4.1	Homoscedastic Example	113
4.4.2	Heteroscedastic Example	114
4.5	Conclusions	122
5	Sequential test procedures for instrumental variable selection	133
5.1	Introduction	133
5.2	Notation, assumptions and the test statistic	136
5.3	Selection of valid instruments	140
5.3.1	Procedure A	141
5.3.2	Procedure B	142
5.3.3	Procedure C	142
5.4	A Monte Carlo Study	145
5.5	An Empirical Example	154
5.6	Alternative inference and a sensitivity analysis	166
5.7	Conclusions	172
5.8	Appendix	176
