Contents

CHAPTER ONE	5
Introduction	5
Multi-positionality during data collection and writing	10
My multi-positionality	11
Statement of the Problem and Research Questions	16
The Rise of HIV Prevention Technologies.....	17
Male Circumcision as an HIV Prevention Technology	18
An Oral History of Circumcision in Eswatini	19
Circumcision for HIV Prevention	20
HIV Treatment as Prevention.....	22
Targeting Men in HIV Prevention	26
Understanding masculinities and health in the context of circumcision and HIV testing and treatment	28
Remedicalizing HIV.....	32
The Study Setting: Eswatini, Kwaluseni and Zombodze	35
Study Sites: Kwaluseni and Zombodze	38
HIV Situation.....	39
Methods	41
Data Analysis	45
Reflections from Data Collection.....	46
Conducting Research at Home	48
Ethics	49
Outline of Chapters	50
CHAPTER TWO	53
Abstract	53
Introduction.....	54
Methods	58
Ethical Considerations	62
Findings	62
Fear of Pain a Major Barrier?	63
MC as a Threat to Masculinity.....	64
Concerns of Loss of Sexual Pleasure	64
Fear of Botched Surgeries.....	66
The Futility of MC.....	67
Fear of the Unknown and Irreversibility of Circumcision	69
Suspicion towards the Origins of HIV and Western Health Interventions.....	71
Adolescents' Perceptions on MC.....	73
Discussion.....	74
Limitations.....	77
Conclusion and Recommendations	77
More Research on the Effects of MC on Sexual Pleasure.....	78
The MC Campaign should address men's concerns	78
Integrate MC into existing HIV Prevention Strategies and create a Comprehensive Health Package for Men	78
Clear Messaging for Everyone.....	79

Empower Men through HIV Education	79
Rigorous Acceptability Studies in the Future	79
CHAPTER THREE	82
Abstract	82
Methods	86
Focus Group Discussions.....	88
In-depth Interviews	88
Participant Observation and Informal Interviews	88
Data analysis.....	90
Ethical considerations	90
Limitations of the study.....	91
Findings	91
' <i>The guilty are afraid</i> ': Reasons for not taking an HIV test	91
<i>The nurses treat you like you are a nobody</i> - Poor hospitality in public health facilities	94
Exposure and stigma – Social consequences of accessing ART services.....	95
Concerns about Early initiation of ART	96
HIV Conspiratorial Theories and Lack of trust in commitment and financial capacity of the Swazi government	97
Discussion.....	99
Conclusion	102
CHAPTER FOUR.....	104
Abstract	104
Introduction.....	105
Methods	107
Data collection	108
Data analysis.....	108
Ethical considerations	108
Sampling.....	109
Findings	109
Respect and autonomy.....	109
Use of incentives to increase uptake.....	111
Informed?	112
HIV testing	115
Discussion.....	116
Conclusion	121
CHAPTER FIVE	122
Abstract	122
Method.....	126
Participants.....	128
Data Collection.....	129
Data Analysis	129
Findings	130
Sexuality, masculinity and male circumcision	131
Income, masculinities and male circumcision	135
Discussion.....	137
Conclusion	138
CHAPTER SIX.....	140

Discussion and Conclusions	140
Looking back from 2021.....	142
Discussion of Main Findings.....	144
Why is the circumcision program failing in Eswatini?.....	145
Life Changing Decisions – Irreversibility of Circumcision and Test and Start.....	150
Resisting Technologies: Why epidemiological evidence is not enough to influence uptake	155
Do Swazi males decide on their own to circumcise?	156
Minding the gap: remedicalization of HIV and the difference between efficacy and effectiveness of interventions	157
Masculinities and health.....	159
Perspective blindness – A lack of a multidisciplinary team of policy makers and implementers	163
REFERENCES	168
LIST OF PUBLICATIONS	183
