The research presented in this thesis was carried out at the Dutch Centre for Avian Migration and Demography and Department of Animal Ecology of the Netherlands Institute of Ecology (NIOO-KNAW). The research was largely funded by the Polar Programme of the Dutch Research Council (NWO-NPP, grant ALWPP.2016.030). Fieldwork in the Netherlands in 2018 was supported by a grant from the Van der Hucht De Beukelaar foundation awarded to M.P. Boom. The expedition to Russia in 2018 was supported by a grant from the Ecology Fund of the Royal Netherlands Academy of Arts and Sciences awarded to M.P. Boom (KNAWWF/713/18004).
