Table 7.33  Availability and type of flexible DCs in languages with one or more flexible PoS classes  298-299
Table 7.34  Availability and type of flexible DCs in languages with rigid PoS classes only  299-300
Table 7.35  Availability and type of contentive/multi-functional clauses in languages with lexical contentives/non-verbs  300
Table 7.36  Availability and type of contentive/multi-functional clauses in languages without lexical contentives/non-verbs  301-302
Table 7.37  Availability and type of nominal clauses in languages with lexical nominals  302
Table 7.38  Availability and type of nominal clauses in languages without lexical nominals  302-303
Table 7.39  Availability of modifier clauses in languages with (derived) lexical modifiers  303-304
Table 7.40  Languages without (derived) lexical modifiers, but with modifier clauses  304
Table 7.41  Availability and type of complement clauses in languages without nouns  304
Table 7.42  Availability and type of complement clauses in languages with nouns  304-305
Table 7.43  Availability and type of relative clauses in languages without adjectives, but with a flexible lexical strategy for the function of modifier in a referential phrase  306
Table 7.44  Availability and type of relative clauses in languages with an open class of simple adjectives  306-307
Table 7.45  Availability and type of relative clauses in languages without an open class of simple adjectives, but with derived adjectives (and a small class of simple adjectives)  307
Table 7.46  Availability and type of relative clauses in languages without an open class of simple/derived class adjectives, but with a small class of adjectives  308
Table 7.47  Availability and type of relative clauses in languages without a lexical strategy for the function of modifier in a referential phrase  308
Table 7.48  Availability and type of adverbial manner clauses in languages without an open class of simple/derived manner adverbs, but with a flexible lexical strategy for the function of modifier in a predicate phrase (and in some cases also a small class of rigid manner adverbs)  309
Table 7.49  Availability and type of adverbial manner clauses in languages with an open class of simple manner adverbs  
310
Table 7.50  Availability and type of adverbial manner clauses in languages without an open class of simple manner adverbs, but with derived manner adverbs (and in some cases a small class of simple manner adverbs)  
310
Table 7.51  Availability and type of relative clauses in languages without an open class of simple/derived class manner adverbs, but with a small class of manner adverbs  
311
Table 7.52  Availability and type of adverbial manner clauses in languages without a lexical strategy for the function of modifier in a predicate phrase  
311

Chapter 8  Discussion: Flexibility and Functional Transparency

Table 8.1  Languages with a flexible PoS class, and the distribution of deranked DCs that appear in at least one of the same function(s)  
323-324
Table 8.2  The principle of increasing complexity: Flexible PoS systems and deranked DCs  
327
Table 8.3  Rigid PoS classes in languages with flexible PoS, and the distribution of deranked DCs that appear in the same function as these rigid PoS classes.  
332-333
Table 8.4  Rigid PoS classes in languages with rigid PoS only, and the distribution of deranked DCs that appear in the same function  
334-335
Table 8.5  Flexible balanced DCs in languages with flexible PoS systems  
337
Table 8.6  Flexible balanced DCs in languages with rigid PoS systems
