Disclaimer/Complaints regulations
If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: https://uba.uva.nl/en/contact, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.
# Contents

1 Introduction  
1.1 The Computer in Systems Biology .................. 1  
1.1.1 The Research Cycle .......................... 2  
1.2 Models: Purpose and Focus ......................... 3  
1.2.1 Macro, Meso and Microscopic Scales .............. 4  
1.2.2 Regimes ...................................... 4  
1.3 Stochastic Phenomena in Bacteria .................. 5  
1.4 Computer Methods for Stochastic Chemical Reactions .. 6  
1.5 Signalling Systems in Bacteria ..................... 7  
1.5.1 Two-Components Signalling Systems ............... 8  
1.6 Objectives of this Thesis ........................ 9  
1.7 Overview of this Thesis .......................... 10  

2 Gillespie Multiparticle Method  
2.1 Background ...................................... 11  
2.2 Description of GMP ............................... 12  
2.2.1 The Operator-Split Reaction-Diffusion .......... 13  
2.2.2 The Diffusion Process ........................ 14  
2.2.3 The Reaction Process ........................ 14  
2.2.4 Choosing a Lattice Discretisation Size .......... 15  
2.3 Enhancements for Low Numbers of Particles ........ 16  
2.3.1 Qualitative Computational Cost Comparison ...... 17  
2.4 Detailed Analysis of the GMP Reaction Mechanism ... 18  
2.4.1 The Reversible Diffusion-Limited Reaction of a Pair of Molecules ............................... 19  
2.4.2 Effects of the Operator-split on the Distribution .... 20  
2.5 Discussion ...................................... 21  
2.6 Conclusions .................................... 22  

3 Noise and Spatial Comparisons ....................... 23  
3.1 Noise in Gene Expression ........................ 24  
3.1.1 The Model ................................... 24  
3.1.2 Comparison of Noise .......................... 25  
3.1.3 Reversible Pair .............................. 25
