Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

List of Figures

1.1	Research cycle	5
1.2	Reductionist approach path and modelling scales	7
1.3	Regimes in cellular biochemical systems	7
1.4	Stochastic simulations for the phage λ lysys-lysogeny	9
1.5	Simulations of MinD oscillations	10
1.6	Illustrations of the bacteria <i>Escherichia coli</i>	14
1.7	Architecture and information flow in a sensory network.	15
2.1	2D slice representation of the spherical cell geometry	23
2.2	Illustration of the operator-split mechanism for reaction- diffusion.	23
2.3	Performance comparison of three dimensional diffusion on a lattice for a low number of particles	28
2.4	Probability distribution of first passage time in 1D for one random walker	31
2.5	Comparison of inter-reaction times between the split-operator method GMP	33
3.1	Simple model of prokaryotic gene expression	38
3.2	Comparison of fluctuations in the number of proteins	41
3.3	Comparison of the noise levels	42
3.4	Probability density function of time between subsequent bindings of an isolated pair of particles	44
3.5	Model of PTS in <i>Escherichia coli</i>	47
3.6	System Mass Evolution in Time (SMET) graph for the PTS pathway	49
3.7	Profile gradients along the radius of a 1/8th of an sphere for the PTS system	50
3.8	Chemotaxis model for <i>E. coli</i>	52
3.9	Flagellar motor occupancy in time	55
4.1	(top) Diagram of a two-component signal transduction pathway	62
4.2	Mean first-passage time to k clusters and noise η^2 vs. coverage fraction Φ	64
4.3	Mean first-passage time to k clusters and noise η^2 vs. number of random walkers	66

LIST OF FIGURES

4.4	Response time for <i>E. coli</i>	69
4.5	Response time (τ_{resp}) for correlated numbers of particles	71
4.6	Comparison of the signalling response time when reaction times increase	72
5.1	Distribution of gene pairs for microbial two-component signal transduction pathways from MiST.	82
5.2	Generic representation of a dicistronic gene	83
5.3	Expression ratio of a dicistronic operon	85
5.4	Expression ratio of dicistronic genes	87
5.5	Dynamic evolution of the ration A/B	89
5.6	Comparison of the number of completed polypeptide	91
6.1	Literature statistics for publications	98
