It is not permitted to download or to forward/distribute the text or part of it without the consent of the author(s) and/or copyright holder(s), other than for strictly personal, individual use, unless the work is under an open content license (like Creative Commons).

#### **Disclaimer/Complaints regulations**

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

# List of Tables

1.1	Publication of new journals in Computational Biology . . . . .	3
1.2	Potential two-component systems in different organisms . . . . .	17
2.1	Statistics of the inter-reaction times distribution extracted from the duration of the dissociated state for GMP using a lattice size $L$ and GFRD. . . . .	32
3.1	Reaction scheme and parameters associated with the gene expression model . . . . .	39
3.2	Initial concentrations and number of molecules for the gene expression . . . . .	40
3.3	Mean and standard deviation of the number of proteins . . . . .	40
3.4	Reaction list and parameters associated to the PTS model . . . . .	48
3.5	Chemotaxis diffusion parameters . . . . .	53
3.6	Reaction rate parameters for the Chemotaxis model . . . . .	53
3.7	Average time (in seconds) to reach motor occupancy of 10 CheYp molecules . . . . .	54
3.8	Average and noise in the level of motor occupancy in steady-state . . . . .	56
3.9	Scaling of the computational cost for the spatial discrete methods . . . . .	58
4.1	Number of total molecules to obtain the same response . . . . .	71
5.1	Gene lengths of two-component signal transduction pathways . . . . .	80
5.2	Statistics for two-component signal transduction pathways . . . . .	81
5.3	Probability of transcribing mRNA with both genes or none . . . . .	84
5.4	Probability of translation of both cistrons or none in a dicistronic mRNA . . . . .	87
5.5	Number of finished polypeptides when mRNA start degrading from the ribosome binding site . . . . .	90
5.6	Number of polypeptide chains with mRNA rapid degradation . . . . .	92
