The journey to this work began back in 2003, though the idea was nurtured and kept alive much earlier. Ben – thank you very much for your constant support and encouragement, your quick tips (from skype) whenever I had nagging technical questions and for the countless reading and re-reading of the manuscripts! I am truly amazed by the amount of things you can handle, and still find time to read and send comments. To my promotor Michiel van der Klis – thank you for supporting me in this project and for the AIO contract with UvA. I thank Ralph Wijers who was a part of "Committee of Learned Men" and decided to allow me for a PhD, even though I had no master's degree or any formal education in Astronomy. Kees Slump at the University of Twente for his encouragement and for his help in the initial days of the PuMa-II project.

After I arrived in the Netherlands, Mark Bentum and Willem Baan were instrumental in discussing with the Management Team to allow me to continue with a PhD, while working a part of time with the Telescope Management System software. ASTRON's support in this aspect is acknowledged and greatly appreciated. Working in Westerbork was unique in several respects: the small group allowed a family-like atmosphere. With Arno as my office mate, all my phone calls were answered. The WSRT jogging group, with relentless Hans, super jogger Geert and every-busy Teun were all part of the Westerbork jogging club. Nico, you were faster than me once - but you sped away at the very last moment!! "Arno's Route" was reserved for the days of quick run. The "Taartjes Route" was occasionally done when we had too many cakes. The "Kraanjes Route" was the most popular, followed by the "melkweg – bospad" routes. These jogging days had a therapeutic effect to the soul. A good jog was rewarded by a nice soup from either Hilly, Albert, Henk or Dirk. Albert, Henk and Dirk -

you have taught the dutch I speak - hartstikke bedankt! Sorry ik heb rare dingen gezegd, zo als "je bent stom" – het was gewoon een deel van het taal leer proces! I thank Jurgen Sluman for those days of car-pooling to Westerbork and help in settling down in the Netherlands. Jur, the first trip to IKEA and to Haren is very much appreciated.

The building and debugging of PuMa-II would have impossible but for the inputs from Rob Millenaar, Sjouke Zwier, Arie Doorduyn, Albert Bos and Harm Jan Pepping. I learnt a lot from you all - thank you. Hans Weggemans has been a colleague with a sharp eye for details. He plugged and unplugged cards and disks tirelessly, and took care of all hardware related issues in the PuMa-II operational environment. In the software side, I thank Willem van Straten for his gentle method of teaching me some finer aspects of pulsar science and for his contribution to the Pulsar Machine-II software. I thank Teun Grit, Hans van Someren Greve and the observers for their patience in explaining the details of TMS and the observing system. In the past, Hanno Holties, Arno Schoenmakers and Rene Vermeulen were managers of the one or the other groups in which I was a member. Thank you for giving me the room to pursue my research.

I would like to thank the following people for easing paper work: Nanuschka Csonka, Marjan Tibbe, Minou van Beuren, Lidewijde Stolte, Eva van Linden, Ester, Anneke, Rita Wekking, Fritz Moller, Agnes Bennen, Diana Verweij and Jeanette Roorda.

I thank Max Avruch, Michelle Zuliani, Kaston, and Adriaan Renting in the Car pool group, who ferried me back and forth to ASTRON. Oleg Smrinov and Giuseppe - thanks for the parties. Esly, Anne and hospitality club group - thanks for your parties too - it helped me interact with a wide variety of cultures.

I thank Swarna for her encouragement and support with my idea to pursue a PhD back in 1998. The "goobal" group - Guru, Sesha, Giri, Uday and Subhas were always fun to talk with. Giri, thanks for your support.

The initial days in Groningen was made much more fun with Madhu, Sarbani, Sameer, Anant and Chetan. Then followed the "da Costastraat group" led by the trinity Kasi, Saravanan and Kumar. Along with Abdul, Ajay, Anil, Eswar, Jai, Rajat, Ruchi, Sivaji and Vinay, otherwise lifeless Groningen was teeming with life on Sundays. Rajesh, Ravi and Loknath - thank you guys. Ravi, your chicken fry still remains a secret. When their partners arrived, the families of Ajay, Abdul and Prashant were very welcoming with a ready dinner. Karthic & Shika, Mani & Kavitha and Vasanth & Sridevi: thank you guys for the nice times.

Friends from KITWOOD have been understanding and supportive at times of difficulty. I would like to mention Arunesh, Karthikeyan and Sampath for the good times in the past four years.

It is a pleasure to acknowledge the pulsar group at UvA. Gemma for being a wonderful colleague and ever ready to help, Eduardo and Patrick for the nice times, Martin for keeping the place alive, Maciej for the nice collaboration and discussions, Jason Hessels, Joeri, Joe Masters, Anastasia for the nice times. Arjan, Michiel and Nathalie: thank you for being such nice room-mates. The institute was a very different place to ASTRON where I worked most of the time. Eventhough I was not a big part of the "API Party scene", the place is certainly very welcoming. I shall miss the people here.

My family back in home has been a constant source of love and support. Anna, Akka,

Velu and Siva - you people are wonderful siblings. Even at times when I faltered, you provided unstinted support that has no equals. Your families and the kids were very welcoming even though I appeared from nowhere amidst you once a year. Appa, even though you left the world so early in my life, I am sure you would be the happiest person to see this work. I wish I had spent more time and provided support to you in the last days. Amma, even though you are my Aunt you took care of me after my mother's passing away. I know that with mere words I cannot express gratitude for your selflessness.

Paramesh, thank you very much for translating the summary to Tamiland Kumar for refining it. Nathalie, thanks for helping me out with the dutch summary, even though you had your observation proposal deadline.

Priya, I thank you for the your support and encouragement. You joined me here in the Netherlands just when I began writing this thesis. You spent long days at home when I was away at the Institute for the most part of the day and even in the weekends. You even pitched in to help with a part of the data analysis in the last stages. You are among the very few people who have seen this work reach this stage. Your presence in the house made it a sweet homecoming after those long days.
