List of Floats

Figures

1.1 Hierarchy of expert types ........................................ 11
2.1 Minimax regret of the regret game with time horizon $T$ ... 34
2.2 Minimax strategy in the regret game with time horizon ... 36
2.3 Minimax strategy in the regret game with loss horizon ... 45
2.4 Backwards induction solution to the $\Xi$-regret game ... 49
2.5 Minimax regret of the regret game with 0–5 switches ... 52
2.6 Minimax regret of the regret game with 0–5 switches (fit) 53
3.1 HMMs ................................................................. 69
3.2 Standard Bayesian mixture $\text{bayes}[\Xi, w]$ .................... 71
3.3 Fixed elementwise mixture $\text{em}[\Xi, w]$ ...................... 72
3.4 Unfolding example ............................................... 75
3.5 Interval notation .................................................. 76
3.6 Fixed share: $\text{fs}[\Xi, w, \alpha]$ ................................ 85
3.7 Interpolation example: graph structure ...................... 88
3.8 The switching method interpolator $\text{sm}$ ...................... 97
3.9 The run-length model interpolator $\text{rl}[\tau, c]$ ............ 99
3.10 Parameter drift: $\text{pd}[\alpha]$ ................................ 105
3.11 Irreflexive switching ............................................ 109
4.1 Example learning expert ........................................... 116
4.2 Full, freezing and sleeping reference schemes ............ 118
4.3 Generalisation relation among prediction strategies .... 121
Bayesian network specification of an EHMM ............ 126
Hidden state transitions in slot machine HMM .......... 126
Sleeping and Freezing EHMMs ............................. 128
Notation example ............................................ 142
An example play $\Lambda$ for Nature ..................... 147
Worst-case plays for Nature are continuous ............. 157
Domain of integration example ............................ 159
Regularisation imposed by the $\epsilon$-pruning Algorithm 5.1 . 162
Expanded Hedge is not Component Hedge on paths ... 184

Tables

2.1 Solution of $2 \times 2$ matrix games .................... 25
4.1 Mixing schemes ............................................. 132
5.1 Example priors ............................................. 155
6.1 Example structured concept classes .................... 173

Protocols

1.1 Sequential point forecasting ............................. 6
1.2 Sequential probability forecasting ..................... 8

Algorithms

2.1 Minimax algorithm for time horizon $T$ ............... 37
2.2 Minimax algorithm for loss horizon $k$ ............... 54
3.1 Forward algorithm ....................................... 77
4.1 Evolving past posteriors .................................. 131
5.1 The $\epsilon$-pruning algorithm .......................... 161
