When I look back at the time when I just started my Amsterdam adventure four years ago, I see how much I have changed through these days and recall all the great moments that I have had the luck to experience. This would not be possible without the many great people I have met here.

It all started with an e-mail from Bas, who invited me here and ‘gave me the opportunity to work in the group’. But saying this would not be enough to describe how much I am indebted to you, Bas. You taught me how to do great science, had great enthusiasm about chemistry and the doors to your office were always open for me to come to discuss all my real and imaginary issues.

Joost, thank you for giving the last touch to my papers and my thesis, giving constructive criticism to my research, but most importantly, for assembling a group of great personalities – a group that one wants to be at.

Jarl Ivar, I have to admit that recently I noticed that you are actually a very nice bloke. Thanks for your valuable comments (also regarding the manuscript) and for being in my opposition. Františku it was a pleasure to work with you on various practica, and to chat during the borrels. Piet, thank you for the input during my (early) minimeetings. Bert, I enjoyed our talks during coffee breaks. I am still astonished with the idea of a broodje koek.

Vladice, it was a great pleasure to meet a true humanist in a catalytic group. We had many nice discussions about languages, history, science and religion. Thanks to you I saw many things from a different perspective and your friendship was a true enrichment of my life (except of the butthole surfers concert). God bless you in all your future enterprises.

Pawle (a raczej: oj Krzysiu, Krzysiu) dzięki za to, że zgodziłeś się zostać moom paranimfem i musisz teraz roznoć te książeczki. Wspaniale było Cię poznać i zobaczyć, że nie tylko jesteś koneserem dobrego polskiego kina, ale i świetnym kumplem i chemikiem (kolejność dowolna). Dzięki, za wspólną pracę, mam nadzieję, że niejeden papier jeszcze razem opublikujemy (se wezmę, spiszę).

Jeroen, the B9.38 outing was a great stunt, thanks for being my chemistry consultant and for sharing the office and the lab with you. It was a great pleasure, especially that your music preferences were so close to mine.

The other (great) members of the group deserve my special thanks too. Dennis (you gave the foundations of my research, I am extremely happy that you are in my committee, take good care of the Tuinkabouter), Guillaume (supergezellig climbing sessions, with discussions about chemistry and the world around it. I enjoyed it very much), Fred (the champion, although being your paranymph was a scary time for me), Pierre-Alain (bbqs at Fokke Simonzs were so nice), Franco (thanks for the movie nights and discussions after football), Fabrizio (always walking… you were the first person who made me laugh with a joke in a language I don’t understand and that was priceless. The Washington/NY trip was also a great adventure), Ivo (passenger Jacobs, I hope nobody will ever maltreat any cup of yours again), Tendai (I guess the only person in the group except of me who understands the concept of pajamas. Although you have authoritarian tendencies I accepted your political views after you had bribed me with ten billion dollars), Leszek (cóż za niespodziewane spotkanie po latach), Tehila (you were always so friendly for everybody), Johanneke (You were so kind with your eagerness to help me or anybody else in the group. Our spelletjesavonden will be also something I
Acknowledgements

remember), Ruta, Fatna, Erik (cheers for all the help in the lab), Fred II (you actually make good cakes), Fabrizio R., Piluka (amazing Dr. del Rio, if we had shared the office longer I would not vouch for myself), Rick (great cycling skills, thanks for the daily batch of cartoons), Michel (1st class football player, do you still have the glass ball from NCCC?), Sumesh (I regret I did not get to know you better), Irshad, Jana, Alma (my sub-group co-nerd), Nicole (the choice of the labouting location was excellent), Markus (Herr Doktor), Miguel (thanks for teaching me how to ‘motivate’ Spanish students), Annemarie (I adored your singing in the lab and your skills as a guide through Almere), Massimo, Sandra, Sara M., Sara A., Carien, Alistair, Taasie (remember the waterballetje and the CO alarm?), Elsbeth, Mark Kuil, Mark B., Rosalba (I particularly enjoyed our Franconian experience), Samir, Yasemin, Axel, Jitte, Rene, Quinten (the non-innocence comes again. Thanks for all the fun at the coffee corner, your precision in jokes and throwing garbage into a bin is legendary), Jurjen (you were such a good mate, I had great fun talking to you about everything – pity we agreed on most issues – and playing in one team with you), Sander (hallo meneertje! Thanks for the anecdotes and for being our group’s artist), Zof, Yann, Iris, Jelmer, Dinesh, Chretien, Annelie (I liked you a lot, but whenever I heard your music I had to turn it off or leave the lab), Evelien, Bart, Remko, Lidy, Zohar, Mandy-Nicole, Guido (dat meen je niet), Rutger, Gennady, Sander O., Gledison, Stefan M., Florian, Ruben, Eoin (you had a great sense of humor, and though you did not have a mullet or even a hat, you were still an excellent climber), Alessandra (I think your plastic animals ate some of the compounds that were in the glovebox).

Thanks to Jan Meine and Jan G. (NMR guys: It was always a pleasure to seek for your help) and Han (the massaman). Paul, thanks for all the fun during every EPR measurement. Jan & Maxime thanks for the beautiful structures you measured for me.

Many thanks to my students. It was very rewarding to guide you and to see how fast your pick up (both chemistry and biking skills) and a real pleasure to get to know you. Luis, you were the first one. You did a great job in the lab. The research you started was the base for Chapter 4 and without you my thesis would be incomplete. Enjoy life, and success with your ‘concrete’ job. Sara, you were a very hard working person and I appreciated it a lot. Although your work did not end up in this book, it made into a very nice manuscript, and I’m sure we’ll see it in print soon. Have fun, and I hope you will be a great teacher. Pascal, Andres and Bart, it was nice to guide you through your projects, good luck with finishing your studies.

Special thanks to the chemists from other groups. Deniz (you and your cat were very good neighbors, extra thanks for your help with housing and for you smile), Szymon (grill i piłka), Vân Anh (our train trip to Leiden, helping you with the glovebox was a real pleasure to me), Sergio (sharing the CV and IR), Matthijs, Alexandre (I still have your bike), Stefan & Peter (keeping my fingers crossed for your defenses) and Dorette.

Thanks to all the members the football team not mentioned above, especially to: Akshay, Alessia A., Alessia G., Alex, Andreas, Arnaud, Filippo, Gabriel, Gordon, Greg, Jaap, José, Kush, Mauro, Tibert, Thomas, Victor and Yves.

Thanks to Maureen and Petra for their administrational help and the library people for their excellent service. Hans, thanks for housing and dinners, although I still have some issues with the tap.

I thank Peter and Jolanda for nice evenings in Utrecht and the trips outside, including the one into the Friese blabber. Ouders van Erica, dank jullie voor de gezelligheid in ‘de stad in het Hoge Noorden’.
Acknowledgements

Many thanks to the people back in Poland. My homies: Szymen, Rufus and Dobo (dzięki chłopaki za to, że zawsze gdy tylko byłem w pobliżu, mogłem się z wami spotkać. To niesamowite, że mimo tego jak różne są nasze drogi, wciąż mamy sobie tyle do powiedzenia). My chemistry mentors: Bogdan Janas (dzięki Sorze za rozwinięcie moich zainteresowań) and Wojciech Grochala (za pomoc w pierwszych krokach w branży i za wesołe maile kontrolne).

Xenia, Edward and Zofia thank you for the support that me and my family have had from you since I was born. It was very moving to meet you again in Columbus.

Without the constant support of my family I would have never gone that far (both scientifically and geographically). Kochani Rodzice, dawaliście mi wsparcie we wszystkich moich decyzjach i mimo, że było wam z tym ciężko, zachęciście mnie do wyjazdu. Jestem wam za to bardzo wdzięczny (jak i za cały wasz proces wychowawczy, który zaowocował tą oto książką). Kasiu, dziękuję za to, że zawsze dawałaś mi wsparcie i za to, że odwiedziście mnie z Tomciem (dzięki Tomek za wprowadzenie ekstra luzu do rodziny).

I thank Erica – a great girl that had the biggest influence on me during these years. Eer, you were the first person in the group that I saw, and instantly became the favorite one (even though once I though you stole my research). You were the most important discovery I made and it was a true blessing that we came across each other here. You are my best friend and without a little bit of you by my side my life would have much less colors. You were with me with all the happy moments here, and gave me support when things went less well. For that and all the love you give me, I thank you A-LOT.

W.
