Acknowledgements, Dankwoord, Agradecimientos

The best and most difficult moments of my doctoral dissertation journey have been shared with many people. I wish to thank a number of them, who generously shared their knowledge and time with me and made it possible.

I would like to express my gratitude to Prof. dr. Ubele van der Velden, whose expertise, understanding, and patience, added considerably to my graduate experience. His wisdom, flexibility, genuine caring, concern, and faith in me during the dissertation process enabled me to attend to life while also earning my Ph.D. He's been motivating, encouraging, and enlightening. He has never judged nor pushed when he knew I needed to juggle priorities. Dear Ubele, you provided me with direction, support and became more a mentor and a friend, than a professor. Even after your retirement, you have remained a supporter and provided insight and direction right up to the end. I am forever grateful. Thank you!

I also want to thank Prof. dr. Bruno Loos for his support during these years. I especially appreciate his good eye for detail. He participated actively in many steps of this dissertation. Dear Bruno, I admire your enthusiasm in life and your passion for work. Thank you for the insightful discussions and for your guidance.

I am thankful to Prof. dr. Wouter Beertsen. Dear Wouter, thank you for your friendship and kindness that embraced me from the very beginning. I have enjoyed your joyful way of living and working.

I am grateful to the remaining members of my dissertation committee, Prof. dr. Frank Abbas, Prof. dr. Vincent Everts, Prof. dr. Arie-Jan van Winkelhoff, and Dr. Fridus van der Weijden. I thank you for your willingness to review my thesis.

I would especially like to take the opportunity to thank the volunteers of the experiments, especially the twins, and all the colleagues of the various periodontal practices across the Netherlands for their efforts in recruiting patients.

Dear Sergio my “paranimfo”, my “ángel de la guarda at paro”, thank you for your patience and kindness, for always having time for a question and for being truly committed in helping me with End Note... I wish you success in your dissertation!

Dear Tony, my paranimf, thanks for sharing with me thoughts, achievements, fears and joy. I am happy we can still count on each other!

My gratitude to Marja Laine for her kind support and guidance during my early lab works at the VU and to Robert Kikkert for his collaboration and incisive comments on my first publication.

Dear Mark, thank you for helping me in the clinical assessment of the twins, for sharing with me your knowledge and critical eye for making nice and appealing presentations (in dutch!)... I really learnt from you!

I am very grateful to Prof. dr. Lucien Aarden. Dear Lucien, thank you for embracing me in your team, allowing me to run most of the experiments under your guidance. Also thanks to my colleagues at the department of Immunopathology at Sanquin Research Institute (colleagues at the CLB). The atmosphere was always friendly and welcoming!

It has been a great privilege to spend these years working at the department of Periodontology (nowadays section Periodontology... I still have to get used to it!). I enjoyed that time of my life and keep nice memories of all of you. Dear “TPOers”, thank you for cheering me up and making me laugh. Dear Elena Alvarez, many thanks for your helping hand on the “Spanish section” of my book and I wish you luck with your research project as well!

Dear Margriet (paró-rose), thank you for your smile and interest in my well being... especially during my pregnancies. I miss you!

Dear Sandra, I remember your empathy from the very beginning... you are such a nice human being, genuine and transparent. I'm glad you have that special connection with Venezuela. Dear Ingrid, I will miss your positive energy and your tremendous enthusiasm in life!

Many thanks to Spiros for the pleasant work atmosphere during these years, I will miss you saying: ... "I think it's a good time to go home"... My thanks to Elena Nicu for the good moments we shared at ACTA and VU. My thanks to Gaia for the nice talks! Siempre has sido una persona especial y valoro nuestra amistad.

Special thanks to Arjen van Wijk, for his assistance in the statistical analysis of the twin data.

Financial support made my doctoral studies possible. I would like to thank the IOT for its continuing support.

Dear colleagues at Dental Udding, specially Aletta and Wendy, thank you for *de gezelligheid* during all these years. Dear Aletta, it has been a pleasure to witness your achievements, very inspiring!

Thanks to all my close friends, who make me a rich, rich person... you know who you are!

My gratitude to Mr. Carlos Cruz-Diez (Venezuelan painter and kinetic artist). I am so honoured to have such a beautiful master piece on the cover of my book. Thank you for all the gifts you have gave us through so many years, for creating new visual and colourful sensations. Thank you for reacting so enthusiastic when I asked you permission for using your serigraphy on my book. You are a pioneer in bringing Venezuelan art into

the international art scene. I admire you profoundly and feel very proud of being Venezuelan as well! Como Ud. bien ha puntualizado: “El arte tiene que estar en la calle, en las fábricas, no colgado de una pared”, creo que de algún modo mi portada contribuye a esta filosofía!

The seeds of my interest in periodontology were planted as an undergraduate student at the Universidad Central de Venezuela, my *alma mater*. I feel lucky that my first patient ever had periodontitis and allowed me to learn so much from her. I am proud you made it Drills and very happy I took part of it! Querida Drills, gracias por ser la mejor paciente que un odontólogo puede desear y por demostrar que la enfermedad se puede superar!

My dear parents, you mean so much to me!... thank you for making me feel so proud just by being your daughter. Both of you have instilled many admirable qualities in me and given me a good foundation with which to meet life. You've taught me about hard work and self-respect, about persistence and about how to be independent. Thank you for teaching me to love learning and for making my education one of your top priorities. Thank you for taking care of me during all those years, even from a distance, I know you care!... I know you always will! Huanito (dad) thank you for being a source of inspiration, thank you for sharing with me your wisdom in life... thank you for giving me freedom and most importantly for showing me that freedom equals responsibility... I couldn't agree more! Dear Mami (mom), you have such a personality! I'm so proud of you, your attitude in life, your strength, resilience and warmth. Thank you for teaching me to read at a very early age... thank you for your love, dedication and trust. Thank you for loving me just the way I am!

Mis queridos padres... los amo y admiro profundamente. Si hay alguno aquí que merece honores esos son Uds. Gracias por regalarme tanta vida, tanto amor, tanta dedicación. Toda una vida no bastará para retribuirles los bienes recibidos. Estoy bendecida por tenerlos y poderlos disfrutar. Como siempre Huani ha dicho: tus logros nadie podrá arrebatarlos! Aquí esta otro Huanito y Mami!

I would like to thank my dear sister, Maguy, for being a role model to me. Gracias Evi por siempre estar allí, preparada para escucharme con amor y paciencia. Gracias por darme el gusto de ser la hermana de tan brillante actuario. Also thanks to my brother, Enrique, for his commitment to excellence in life and work. Querido Ergu, tu constancia en los estudios y trabajo ha servido como marco de referencia en mi camino.

Special thanks to my family in Venezuela, for their support even though they are still wondering what I was doing and above all why. Mi abuelita bella, mi Lucci, mil gracias por tus oraciones y buenos deseos, han sido una lucecita en mi camino. Gracias a toda mi hermosa familia en Venezuela, siempre los llevo en mi corazón y los recordaré muy especialmente el día de la defensa de mi tesis!

My dearests, my Salvador, my Aída, when you're old enough to read, I hope you're as proud of your “mami” as she is of you both. Mommy thanks you little treasures for providing a constant source of happiness. Mi Buggy, mi negrita, thank you for giving me the opportunity to share your lives with me... you are “my little piece of heaven”. Parenting is hard, hard work, but when combined with a dissertation it becomes a real challenge. Fortunately I like hard work and have the best team!... Thank you “mis niños” for having the patience to let me try to be the best mother for you. Thank you for letting me be in your lives, allowing me to learn and grow together. Parenting is definitely the most rewarding and colorful journey a human soul may go through... I am the luckiest for enjoying this gift!

My dear Patrick (Neni), my love, my confident, my friend... you have been supportive and patient in every way, I give you my love and gratitude. You went through every excruciating step and mood change with me. Through your eyes I've seen myself as a capable, intelligent woman who could do anything once I made up my mind, reminding me why I fell in love with you in the first place. Thank you so much. A lifetime with you will always be too short. Te amo!

Thank you God for your blessings, for the light I have been able to see and for being there for me all the time! Also, thanks to you, my guide, I know you are proud of me...

My heartfelt thanks to all others whose names I did not mention, but who contributed in any form towards the successful completion of the dissertation. Thank you all!
